Where
there is light
there is love.

Alessandro Zavater CEO
Enea Ferrari Founder

Linea Zero, azienda leader nel settore dell'illuminazione di interni, è stata fondata a Verona nel 1973 da Enea Ferrari. Grazie ai suoi progetti, ha permesso a Linea Zero di evolversi per diventare un punto di riferimento nella produzione di lampade contemporanee e funzionali, inizialmente indirizzate al settore bambino e in seguito estese al design. Il Made in Italy continua ad essere, per Linea Zero, il più importante dei valori aziendali.

Da oltre 40 anni Linea Zero è sinonimo di ricerca e crescita continua, sempre rivolta ad interpretare al meglio le esigenze di mercati in rapida evoluzione, mettendo a punto precise politiche e strategie commerciali, ma sempre con particolare attenzione alle esigenze del cliente. Un percorso imprenditoriale dinamico che traccia i confini di un nuovo futuro, espressione di design, smart lighting e innovazione anche grazie ad un team rinnovato e giovane.

Linea Zero — — About

Linea Zero, leading company in interior lighting, was founded in Verona in 1973 by Enea Ferrari.

His project lead Linea Zero to his role of key brand in the production of contemporary and functional lamps, initially destined to the children's market and subsequently extended to design.

To this day, the Made in Italy represents one of the most important values of the company.

For over 40 years Linea Zero has been synonym with research and continuous growth, always aimed to best interpret the rapidly increasing market requirements by elaborating specific commercial policies and strategies and paying particular attention to customer's satisfaction. A dynamic entrepreneurial approach that outlines the frontiers of a new future, expression of design, smart lighting and innovation that relies on a new and young team.

Index — — Timeline

Enea Ferrari established the company specialised in the manufacturing of objects, accessories and plastic lighting

Foundation

1964

Linea Zero is born. The company acquires OTF and the brand's patents

A new beginning

1973

The company conquers the Asian market with the launch of a lamp inspired by London's Red Box Phone

Far East

1985

Linea Zero expands overseas, conquering the U.S. market

USA

1980

1970

Tucano

The OTF patented by Tucano is the world's first children's plastic lamp

1975

Europe

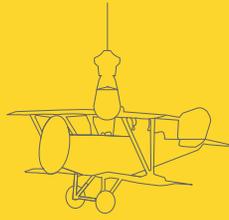

Year of the European expansion. France, Germany, Austria and Belgium become the main destination markets

1984

Pink Panther

Linea Zero acquired the licence for the production of the lamps dedicated to the famous Pink Panther

'Biplano' is born. The lamp instantly became the company's best selling product. Moreover, the company lands the deal for the production and distribution of the lamps dedicated to the Disney characters

Disney

1993

Linea Zero focuses on the expansion in the Arab countries. In the same year the 'Veliero' is launched

Emirates

1998

Enea Ferrari designs the Helios Family, a new iconic product symbol of Linea Zero

Helios Family

2001

Since 2016 all the lamps by Linea Zero support LED technology. Today the company has established itself as one of the most influential players in the field of domestic and contract lighting

TODAY

1988

Snoopy

Linea Zero begins the production and distribution of the lamp dedicated to the popular cartoon Snoopy

1995

Dromos

'Dromos' is born. The lamp instantly became the company's best selling product

2000

Looney Tunes

Linea Zero begins the production and distribution of the lamp dedicated to the popular cartoon Looney Tunes

2013

The Brand

Alessandro Zavater takes over the reins of the company, giving the brand a new lease of life by focusing on the concept of "Smart Design"

People — — of light

Since 1973 Linea Zero believes in the value of people who,
with their knowledge, creativity and incessant research,
were able to make the path of the company a reality.
Limits transform into challenges to be won, with ideas.

Linea Zero dal 1973 crede nel valore delle persone che, grazie alla conoscenza,
alla creatività e alla ricerca continua, hanno reso possibile il percorso dell'azienda.
I limiti diventano sfide da vincere, grazie alle idee.

Enea Ferrari, Founder

Alessandro Zavater, CEO

Alessandro Zavater, CEO

Linea Zero Family

Inside — — materials

The products designed by Linea Zero are made of two materials, Polilux™ and methacrylate, which ensures thickness, impact resistance, transparency and light diffusion, confers the spaces a welcoming and warm feel.

DETTAGLI DEL MATERIALE

I prodotti Linea Zero sono realizzati in due materiali, il Polilux™ e il metacrilato, che garantiscono robustezza, resistenza agli urti, trasparenza e diffusione della luce, donando agli interni un senso di accoglienza e di calore.

THE PERFECT SHAPE OF POLILUX™

Continuous research allowed Linea Zero to conceive a special material that combines aesthetics to other essential elements as efficiency and functionality. Polilux™ is an exclusive material able to provide products with the same brightness as glass, while offering many other advantages: Linea Zero collections are, in fact, light, flexible, shatterproof, antistatic and extremely versatile. And not just that. Thanks to its special composition, Polilux™ is nontoxic, extremely light and weather resistant; it does not yellow over time and boasts excellent resistance to solvents and all home cleaning products.

LA FORMA PERFETTA DEL POLILUX™
Grazie alla continua ricerca, Linea Zero ha ideato uno speciale materiale che permette di unire all'estetica altre peculiarità essenziali, come l'efficienza e la praticità. Il Polilux™ è infatti un esclusivo materiale che dona ai prodotti una luminosità pari a quella del vetro, oltre ad aggiungere molti altri vantaggi: le collezioni Linea Zero sono infatti leggere, flessibili, infrangibili, antistatiche ed estremamente versatili. Ma non solo. Grazie alla sua speciale composizione, il Polilux™ è atossico, estremamente resistente alla luce ed agli agenti atmosferici, non ingiallisce nel tempo, vanta una eccellente resistenza ai solventi e a tutti i prodotti per la pulizia domestica.

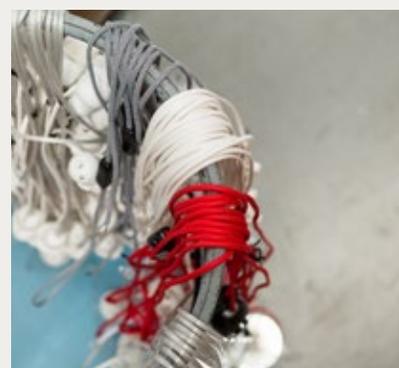

A RAINBOW OF COLOURS

Linea Zero created a wide selection of colour gradations, ranging from coloured Polilux™ to the most advanced printing and painting techniques.

These shades transform each lamp into a bright rainbow, able to create a unique and evocative atmosphere.

UN ARCOBALENO DI COLORI

Linea Zero ha ideato un'ampia gamma di gradazioni di tinte, dal Polilux™ colorato all'utilizzo delle più aggiornate tecniche di stampa e verniciatura. Queste cromie rendono le lampade stesse degli arcobaleni luminosi, capaci di creare atmosfere uniche e suggestive.

THE STRONG IMPACT OF METHACRYLATE

A selection of lamps by Linea Zero is made of methacrylate, a rigid thermoplastic material of exceptional clarity. Specific cleaning products provide dust resistance making it perfect for its exposure to light, both in its transparent or coloured versions. While featuring a superior transparency than glass, this material is remarkably less fragile.

IL FORTE IMPATTO DEL METACRILATO

Una selezione di lampade Linea Zero è realizzata in metacrilato, un materiale termoplastico rigido e di un'eccezionale limpidezza. Specifici prodotti per la pulizia lo rendono resistente alla polvere ed è perfetto per l'esposizione alla luce, sia esso trasparente o in finiture colorate. Vanta infine una trasparenza superiore al vetro, ma con una fragilità decisamente ridotta.

SECURITY

In order to offer maximum reliability and efficiency, while protecting the environment, Linea Zero meets the rigorous European quality standards and the related certifications subject to stringent safety regulation. The company adheres to Safety European Standards, ROHS and WEEE. Specifically, the lamps from Linea Zero Kids collection served as benchmark for the drafting of the first European legislation on children's lamps.

SICUREZZA

Per offrire ai prodotti la massima affidabilità ed efficienza e garantire una puntuale attenzione rivolta all'ambiente, Linea Zero sposa i rigorosi standard qualitativi europei e le relative certificazioni, regolati da stringenti normative di sicurezza. L'azienda rispetta infatti le normative Europee di Sicurezza CE, Safety European Standards, ROHS e WEEE. In particolare, le lampade della serie Kids di Linea Zero sono state utilizzate come parametro di riferimento per la stesura della prima normativa europea sulle lampade da bambini.

ON DEMAND

The catalogue of Linea Zero represents a starting point; a hint on the potential that the brand is capable of expressing converting customer's ideas into reality. The materials used combined with the experience of the team free the design process from technical constraints, allowing for any prototype to be produced, starting with a model we created upon the customer's recommendations. Linea Zero, hence, offers the possibility of achieving a complete customisation of the product that will fit a specific context, a bulb for a specific customer needs or will be personalised with a dedicated colour or a silk-screen customised print. For the Litos and Decolight product lines, Linea Zero created a real made to measure service through which it offers the chance of shaping the customer's product starting from a logo a pantone, a decorative pattern or a size indication. The attention dedicated to the management of this project, from the initial concepts to the finished product, ensures the distinctive quality and precision of the Made in Italy and of a company that was founded over 40 years ago.

SU MISURA

Il catalogo Linea Zero è un punto di partenza: un accenno sul potenziale che il brand sa esprimere nel convertire le idee dei clienti in creazioni concrete.

I materiali utilizzati e l'esperienza del team dell'azienda liberano infatti la progettazione dai vincoli della tecnica e permettono di realizzare qualsiasi prototipo, a partire da un modello da noi realizzato su indicazione del cliente. Con Linea Zero è quindi possibile ottenere una completa personalizzazione del prodotto, che si adatterà ad un ambiente particolare o diventerà completamente su misura con un colore studiato ad hoc, una lampadina specifica per le esigenze del cliente o una stampa serigrafica customizzata. Per le serie Litos e Decolight, inoltre, Linea Zero ha pensato ad un vero e proprio made to measure, con la possibilità di modellare il prodotto partendo da un logo, un pantone colore, un pattern decorativo o un'indicazione dimensionale.

La cura nella gestione del progetto, dalle prime idee al prodotto finito, garantisce la qualità e l'attenzione tipiche del Made in Italy e di un'azienda che esiste da più di 40 anni.

IL LED

Linea Zero dedica grandi energie alla ricerca e sviluppo, nell'ottica di individuare soluzioni energetiche all'avanguardia. A questo proposito, tutte le lampade a catalogo* supportano la tecnologia LED e dal 2016 il prezzo delle lampadine extra, fornite dall'azienda su richiesta, è uguale sia per quelle a fluorescenza che per quelle a LED. Un grande traguardo per diffondere sempre più l'impiego di questo sistema, responsabilizzando quindi gli utenti nei confronti dei consumi energetici.

Le lampadine a LED infatti emettono lo stesso flusso luminoso (in lumen) di una lampadina classica, ma con un consumo energetico notevolmente ridotto, fino a 6 volte in meno. Scegliendo bene una lampadina, quindi, il risparmio può essere considerevole.

Per supportare i clienti nell'acquisto di lampadine a LED, Linea Zero ha realizzato una Guida dedicata (disponibile sul Blog dell'azienda), con utili informazioni come la scelta del grado luminoso, il colore della luce e lo smaltimento.

The — — Led

Linea Zero is strongly committed in the research and development aimed to identify innovative energy solutions. Accordingly, all lamps included in the catalogue* support LED technology and, since 2016, the price of additional LED light bulbs, available upon request, is the same as fluorescent models.

A major step towards the diffusion of the adoption of this system, achievable by spreading energy consumption awareness among users. LED light bulbs provide the same luminous flux (in lumen) as traditional ones, but using considerably a lower amount of energy, up to 6 times lower. The correct choice of a light bulb leads, therefore, to significant savings.

Encouraging customers to purchase LED light bulbs, Linea Zero created a special Guide (available on the company's Blog) offering useful information as the selection of brightness, colour of light or disposal.

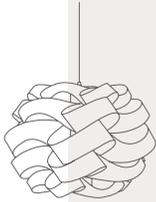

*Except Lampagirò, which cannot operate with LED lighting, since it requires the warmth generated by the light bulb to rotate.

*Ad eccezione del modello Lampagirò il quale, avendo bisogno del calore generato dalla lampadina per ruotare, non può funzionare con il LED, per sua natura pressoché privo di emissioni termiche.

Cloud

Design by Enea Ferrari

Fluffy as clouds kissed by the rays of the sun, the soft and enveloping lines of the Cloud collection create elegant and refined shapes of great evocative effect.

Soffice come una nuvola baciata dai raggi del sole, dalle linee morbide e avvolgenti, le lampade della collezione Cloud creano eleganti e ricercate forme di luce di grande effetto scenico.

Design by MM Company

Delicate and exotic as the flower it is named after, the Calle line tastefully illuminates and decorates with elegance. The methacrylate structure paired with a Polilux™ lampshade give life to its table version.

Come il fiore esotico e delicato, la serie Calle si presta a illuminare e arredare in maniera discreta ed elegante. Struttura in metacrilato e paralume in polilux: dall'unione essenziale dei due elementi nasce la versione da tavolo.

Roller

Design by MM Company

Transparencies' effects unveil the thorough research and creativity behind the Roller, an apparently simple and linear lamp that is however able to enhance any type of interior, be it domestic or professional.

I giochi di trasparenza svelano l'attenta ricerca e creatività che stanno alla base della Roller, una lampada semplice e lineare all'apparenza, che riesce però ad arricchire qualsiasi tipo di interior, dalla casa all'ufficio.

Enea Ferrari

— — Story of creation

*Creativity is unrestrained, pure, sincere, uncontaminated.
Just like the ideas of a child.*

Since he was a child, Enea Ferrari, founder of Linea Zero, has always enjoyed creating, drawing and building wood and metal model airplanes, cars, sailing ships or other objects.

Creations that made him feel free to explore new horizons. To this day, he flies, dreams and creates with the same spirit. The spirit of an aviator, of a dreamer, free and adventurous.

La creatività è incontrollabile, pura, sincera, incontaminata.

Proprio come le idee di un bambino.

Enea Ferrari, fondatore di Linea Zero, fin da piccolo si divertiva a ideare, disegnare e costruire modellini in legno e metallo di aereoplani, macchinine, velieri e oggetti.

Creazioni che lo facevano sentire libero di esplorare nuovi orizzonti. Ancora oggi in azienda vola, sogna e crea con lo stesso spirito di sempre.

Quello di un aviatore, libero, avventuroso e sognatore.

Catalogue

— — Young & Kids

Every morning the world serves as a blank sheet that attracts children with its brightness and waiting for them to fill it up with their colours.

Children's rooms are the place where they grow and learn.

Keeping this in mind, Linea Zero created a wide collection of safe, lively lamps that fit the space enhancing its magic and enchantment.

Discover the Kids catalogue featuring all the lamps and accessories dedicated to the little ones.

NOTE: In case the lamps will be located in contact with children, for their safety, they must be permanently fixed to the wall or table using the supplied accessories to prevent their movement.

Ogni mattina il mondo è un foglio di carta bianco e attende che i bambini, attratti dalla sua luminosità, vengano a impregnarlo dei loro colori.

Le camerette dei più piccoli sono il luogo in cui loro crescono e imparano.

Linea Zero ha pensato a questo per realizzare un'ampia collezione di lampade sicure, vivaci e adeguate a questo spazio, per renderlo ancora più magico e incantato.

Scopra il catalogo della serie Kids, con tutte le lampade e gli accessori perfetti per i più piccoli.

NOTA: Nel caso in cui le lampade vengano utilizzate in ambienti a contatto con bambini, per ragioni di sicurezza, esse devono essere fissate in modo permanente a parete o a tavolo, utilizzando gli appositi accessori in dotazione, in modo tale da evitare che vengano spostate.

Pois

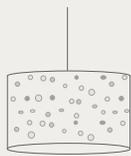

Design by Enea Ferrari

Bicolour becomes fun and pop for the lamps of the Pois collection. Essential lines and eccentric look.

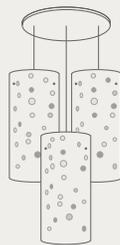

Il bicolore diventa divertente e pop nelle lampade della collezione Pois, essenziali nella sagoma ma stravaganti nell'estetica.

As the stories of the good night, these lamps create a bright and colorful carousel that will accompany the child in the tender bedtime. The rotation mechanism works with the heat of the bulb, more heat creates more turns the decoration. The new generation bulbs are suitable (halogen-eco) from 28/46W corresponding to the standard 40/60W. To get the revolving effect we recommend halogen-eco bulbs to 40/46W. For the safety of your children is supplied with a bracket for wall applications.

Come le fiabe della buona notte, queste lampade creano un carosello luminoso e colorato che accompagnerà il bambino nel tenero momento della nanna. Il meccanismo di rotazione funziona con il calore della lampadina: più scaldano più crea il calore che fa girare il decoro. Le lampadine di nuova generazione adatte sono (halogen-eco) da 28/46W corrispondenti ai 40/60W standard. Per ottenere l'effetto girevole raccomandiamo lampadine halogen-eco da 40/46W. Per la sicurezza dei vostri bambini è in dotazione una staffa per l'applicazione a parete.
