HAND MADE

Elesi Luce®

Catalogo / Catalog

Una famiglia, persone unite dalla grande passione per il nostro lavoro. Ogni lampada racchiude un'idea che prende forma con il tempo, lo studio e la progettazione per trasformare la materia in luce. Le mani creano con dedizione, pezzo dopo pezzo, l'elemento che illuminerà ambienti vicini e lontani.

A family, people united by a passion for their work. Each product embodies an idea that takes shape over time, through study and design, transforming material into light. Piece after piece, our dedicated hands create lighting elements for worldwide applications.

24 anni di storia

Dal 1997 progettiamo lampade efficienti e di design e questo, oltre ad essere il nostro lavoro, è anche la nostra passione. Negli anni siamo cresciuti, abbiamo innovato i processi produttivi e introdotto nuove tecnologie senza mai dimenticare quanto per noi sia importante rimanere fedeli alle nostre origini artigiane, alla cultura del territorio e alla sua impronta imprenditoriale. Per questo abbiamo scelto consapevolmente di produrre nel rispetto del "Made in Italy".

"Ci piace pensare che le persone che acquistano i nostri prodotti condividono anche la nostra idea di luce"

24 years of history

We have been designing lighting products since 1997. It's a job we are passionate about. Over the years we have developed, innovating the production processes and introducing new technologies, never forgetting how important it is for us to stay true to our artisan origins, our local culture and its entrepreneurial tradition. This is why we have made a conscious decision to follow the "Made in Italy" philosophy.

"We like to think that the people who purchase our products also share our idea of light"

Il nostro DNA

PERSONE Siamo un'azienda, ma soprattutto siamo un gruppo di persone che creano, sviluppano e realizzano lampade per illuminare ambienti destinati a persone che abitano luoghi e spazi diversi, ciascuno con le proprie abitudini ed esigenze. Chi sceglie le lampade Elesi Luce non è un semplice cliente, ma una persona che condivide questa nostra visione.

ARTIGIANALITÀ Per noi è una vocazione. Tutte le nostre lampade vengono controllate nelle diverse fasi di realizzazione e assemblate a mano pezzo per pezzo con cura, passione e attenzione ai dettagli. Doniamo a ciascuna lampada l'unicità e la ricercatezza del «fatto a mano».

INNOVAZIONE Siamo curiosi per natura e crediamo di poter dare il nostro piccolo contributo per un futuro migliore. Per questo partecipiamo a incontri intersettoriai, a studi di ricerca con aziende e università del territorio, a eventi e corsi formativi. Applichiamo le competenze acquisite all'organizzazione dei processi aziendali, ai materiali e alle tecnologie utilizzate nei nostri prodotti e ai servizi che offriamo.

AMBIENTE Il rispetto per l'ambiente orienta Elesi Luce verso l'utilizzo di materiali durevoli, a basso impatto ambientale e riciclabili, con occhio sempre attento alla sicurezza dei dispositivi nelle varie fasi di vita dalla produzione alla spedizione, dall'installazione all'utilizzo.

“La sintesi di fatto a mano e innovazione”

Our DNA

PEOPLE We are a company, but above all we are a group of people who conceive, develop and manufacture lighting products for a whole range of different situations, each with their own characteristics and requirements. A customer who chooses Elesi Luce is not simply a customer but a person who has found a solution from among our products.

CRAFTSMANSHIP Craftsmanship is our vocation. All the products are checked at every manufacturing stage and are assembled by hand piece by piece with maximum care and attention to detail, giving each article the uniqueness and refined elegance typical of a handmade product.

INNOVATION We are curious and we are keen to make a contribution to a better future. We take part in cross-sector meetings, research studies with local companies and universities, events and training courses. We apply the skills acquired to organization of the company processes, to the materials and technologies used in our products, and to the services we offer.

ENVIRONMENT Elesi Luce's respect for the environment can be seen in the use of long-lasting recyclable materials with low environmental impact, always paying attention to safety at all stages, from production and shipment right through to installation and use.

“Bringing together artisan skills and innovation”

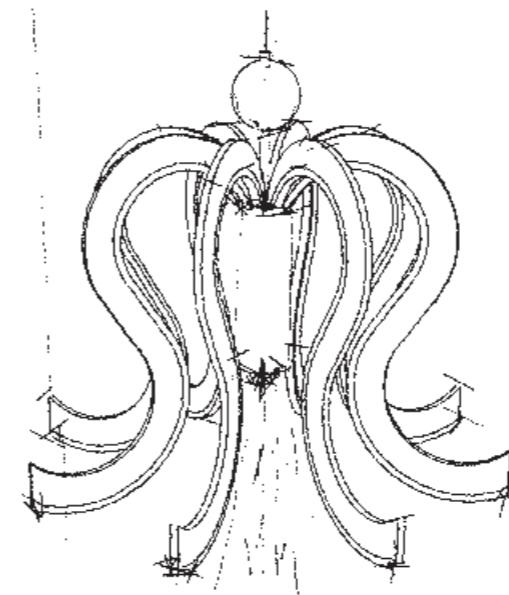

Elesi Creative Lab

Consideriamo il Elesi Creative Lab il luogo nel quale prende forma la nostra idea di progettazione sostenibile, green thinking, made in Italy e fatto a mano; Atelier contemporaneo nel quale le lampade vengono realizzate con la versatilità e qualità del “pezzo unico” e con la possibilità di personalizzare finiture e produzioni. Orientamento al tailor-made che significa, nella nostra visione, operare con una metodologia che miri alla creazione di soluzioni su misura, anche molto diverse per materiali, forme e dimensioni dalle collezioni presentate. Tutte le nostre lampade sono pensate per la soddisfazione delle esigenze funzionali ed estetiche dei clienti e per dare il giusto comfort visivo negli ambienti in cui le persone vivono e lavorano.

Elesi Creative Lab

We consider the Elesi Creative Lab the hub of our sustainable design project and green thinking, the birthplace of our made-in-Italy hand-crafted products; a contemporary atelier where we create our lights with the versatility and quality of unique pieces, with the option of customized production and finishes. Our tailor-made approach means that we adopt methods aimed at creating made-to-measure solutions which can be very different, in terms of materials, forms and dimensions, from the collections presented. All our lights are designed to meet the functional and aesthetic requirements of our customers and to provide the right visual comfort in environments where people live and work.

•E

Green Thinking

*“Diamo il nostro contributo per un presente e un futuro migliori
aderendo agli obiettivi di Agenda2030”*

“We make our contribution for a better present and future adhering to the objectives of Agenda2030”

- 3.** La luce partecipa al benessere psico-fisico degli essere viventi.
Progettiamo lampade che garantiscono comfort visivo negli ambienti in cui viviamo.
Light participates in the psycho-physical well-being of living beings.
We design lamps that guarantee visual comfort in the environments in which we live.

4. Sosteniamo le competenze individuali con la formazione e collaborando con le scuole del territorio.
We support individual skills with training and education and collaborating with schools in our territory.

5. Promuoviamo il dialogo con le persone nel rispetto reciproco.
We promote dialogue with people in mutual respect.

8. Un ambiente di lavoro familiare, confortevole, dove sentirsi a proprio agio.
A familiar, comfortable work environment, where you can feel at ease.

9. Il valore dell'artigianato in una organizzazione snella e 4.0.
The value of craftsmanship in a lean and 4.0 organization.

12. I prodotti sono progettati per avere un basso impatto ambientale durante tutto il ciclo di vita produzione, utilizzo, riparazione o riuso, riciclo.
The products are designed to have a low environmental impact throughout their life cycle: production, use, repair or reuse, recycling.

17. Collaborazione tra aziende ed enti che condividono gli stessi obiettivi.
Collaboration between companies and organizations that share the same objectives.

LED-Change System

Ispirati dal “Green Thinking” e da un attento ascolto delle esigenze del Cliente, abbiamo sviluppato soluzioni innovative per una facile e immediata sostituzione della sorgente a LED direttamente sul luogo di installazione. Questo per noi è “LED-Change System”: tecnologie che aumentano il ciclo di vita del prodotto e ne diminuiscono l'impatto ambientale, una azione concreta per salvaguardare il mondo che ci ospita.

Inspired by “Green Thinking” and by listening carefully to customer needs, we have developed innovative solutions for simple immediate LED replacement directly on site. Our LED-Change System features technologies that prolong the product life cycle and reduce environmental impact, a concrete step towards safeguarding the world we inhabit.

Questo è il simbolo che contrassegna le lampade a led integrati dotate di "LED-Change System". Per queste lampade sono previsti kit di sostituzione LED contenenti le istruzioni che consentono al tecnico specializzato una rapida e semplice intervento.

This is the symbol that marks our integrated LED lights with LED-Change System. These lights are provided with LED replacement kits containing instructions for quick simple intervention by qualified technicians.

Vantaggi:

- Assistenza facile e immediata
 - Diminuzione dei costi
 - Riduzione dei rifiuti
 - Aumento del ciclo di vita del prodotto

Advantages:

- Easy immediate support
 - Reduction of costs
 - Reduction of waste
 - Longer product life cycle

“Il sistema che consente la sostituzione del LED”
“The easy LED replacement system”

Racconti di luce

Stories of Light

*“È la bellezza un raggio
di chiarissima luce
che non si può ridir quanto riluce
né pur quel ch’ella sia.*

(Torquato Tasso - poeta)

*“Beauty is a ray of light
so clear you cannot explain
how luminous it is
or even what it is”*

(Torquato Tasso - poet)

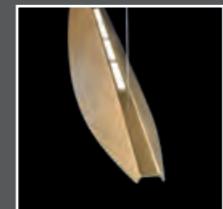

La filosofia descrive la luce come ciò che permette di vedere, di distinguere le forme, la profondità della realtà. È la luce che rivela e svela; ciò che non è illuminato non ci è dato di conoscere. Ogni nostro prodotto racchiude una storia, fatta di passione, competenza ed innovazione. Ogni collezione ha la sua personalità, il proprio DNA. Per questo abbiamo pensato di invitarvi a fare un viaggio con noi, attraverso le storie che ogni giorno ci accompagnano.

According to philosophy, light is what enables us to see, to distinguish forms and the depth of reality. Light reveals and unveils; we have no way of knowing what is not illuminated. Each of our products tells a story of passion, competence and innovation. Each collection has its own personality, its own DNA. This is why we have invited you to come on a journey with us, through the stories that accompany us daily.

**La tua storia di luce**

Creiamo soluzioni speciali di illuminazione: dalla personalizzazione della finitura alla realizzazione di lampade su progetto.

Your stories of light

We create special lighting solutions: from the customization of the finish to the production of customized lamps.

Storie di effetti

“L’Architettura è il gioco sapiente, rigoroso e magnifico dei volumi sotto la luce.”

(Le Corbusier - Architetto)

Stories of effects

“Architecture is the learned game, correct and magnificent, of forms assembled in the light.”

(Le Corbusier - Architect)

La luce interagisce con la materia, creando dei fenomeni attraverso i quali gli oggetti si rivelano ai nostri occhi. Storie di Effetti raccontano di collezioni dove la luce e la materia creano effetti evocativi, plasmando gli spazi nei quali sono inseriti. Qui la trama della storia diventa emozione da vivere.

Light interacts with matter, creating phenomena through which objects are revealed to our eyes. Stories of Effects describe collections where light and matter create evocative effects, modelling the spaces they occupy. Here the story plot becomes an emotion waiting to be experienced.

Gaia

Designer: Alessandro Todesco

“Emozioni e sensazioni armoniche”
“Harmony of emotions and sensations”

DESIGN Forma semplice arricchita dal gioco di pieni e di vuoti, Gaia dona all'ambiente piacevoli effetti luminosi che creano una atmosfera dinamica. Un gioco di luce che suscita emozioni e sensazioni armoniche.

PERSONALITÀ E' una lampada dalla vocazione Green: efficienza del led integrato, scelta di materiali riciclabili, lungo ciclo di vita. Leggera e resistente, il suo corpo è in alluminio. La luce viene plasmata attraverso i tagli laser 3D esaltandone la forma.

MAESTRIA La finitura bronzo è eseguita artigianalmente con 3 passaggi di colore per creare l'effetto bicolore con l'interno oro e l'esterno bronzo. La lavorazione bronzo è eseguita a mano, rendendo unica ogni lampada.

DESIGN A simple shape enhanced by the interplay between solids and voids, Gaia creates interesting lighting effects and a dynamic atmosphere. A play of light that evokes a harmony of emotions and sensations.

PERSONALITY A product with a green vocation: integrated LED efficiency, recyclable materials, long life cycle. Lightweight and strong, with aluminium body. The light is shaped by the 3D laser cuts, enhancing its form.

EXPERTISE The bronze finish is the result of 3 colour passes to create the two-colour effect with the gold interior and bronze exterior. This process is carried out by hand, making each product unique.

BZ - Bronzo La finitura bronzo è eseguita artigianalmente con 3 passaggi di colore per creare l'effetto bicolore con l'interno oro e l'esterno bronzo.

BZ - Bronze The bronze finish is the result of 3 colour passes to create the two-colour effect with the gold interior and bronze exterior.

TN - Titanio Il colore Titanium è un grigio scuro con tonalità calda. Accesa la luce illumina l'interno della lampada creando un effetto bicolore.

BZ - Titanium The Titanium color is a dark gray with a warm hue. When turned on, the light illuminates the interior of the lamp, creating the two-colour effect.

BB - Bianco Il colore bianco trova la sua naturale esaltazione negli ambienti con le pareti colorate. Installata su pareti bianche la lampada si integra nell'ambiente, per evidenziare la sua personalità quando viene accesa.

BB - White The white color finds its natural exaltation in the rooms with colored walls. Installed on white walls, the lamp integrates into the surroundings, to highlight its personality when it is turned on.

Alba

Designer: Roberto De Santi

“La luce che disegna la forma”
“Light designs form”

DESIGN Alba rappresenta l'intimo legame tra luce e forma. La figura di appartenenza, il cerchio, non si conclude nella forma tangibile ma si dilata nello spazio.

PERSONALITÀ L'effetto creato dalla lampada richiama il valore ancestrale della luce nel suo apparire. Una forma sospesa e leggera che si esalta con la luce. I led integrati ad alta efficienza e l'alluminio riciclabile la rendono una lampada a basso impatto ambientale.

MAESTRIA Per esaltare il colore naturale della luce, la parte interna della lampada è sempre color bianco. La rifinitura esterna può essere personalizzata.

DESIGN Alba represents the intimate link between light and form. The design is based on a circle, an incomplete figure stretching into space.

PERSONALITY The effect created recalls the ancestral values of light as it appears at dawn. A suspended lightweight form enhanced by light. The high efficiency integrated LEDs and the recyclable aluminium make it a product with a low environmental impact.

EXPERTISE To enhance the natural colour of the light, the inner part of the lamp is always white. The outer finish can be customized.

Iconic

Designer: Simone Bellicini

“L’equilibrio di figure essenziali”
“The balance of essential figures”

DESIGN Un incontro di forme essenziali. Attraverso una meccanica di precisione, un cilindro, un cono e una sfera si fondono per creare un elemento di design raffinato e iconico.

PERSONALITÀ Iconic illumina gli ambienti rispecchiando il tuo stile grazie ai suoi elementi modulari che permettono di realizzare soluzioni personalizzate. L’alluminio riciclabile della struttura e il led integrato la rendono a tutti gli effetti una lampada sostenibile.

MAESTRIA La cura nel dettaglio si esprime nell’alluminio e ottone attraverso la spazzolatura del metallo eseguita completamente a mano. Quell’artigianalità che conferisce unicità a ciascuna lampada.

DESIGN A meeting of essential forms. Precision engineering helps to blend a cylinder, a cone and a sphere to create an elegant iconic design element.

PERSONALITY With its modular elements that allow customized solutions, Iconic reflects your style. The recyclable aluminium structure and integrated LED make this a sustainable lighting product.

EXPERTISE Attention to detail in the 100% hand-brushed aluminium and brass, an artisan touch that makes each product unique.

Configurable

Iconic è stato pensato come elemento basilare che può essere inserito in molteplici soluzioni illuminotecniche. Oltre alle proposte presenti, si possono creare combinazioni su misura per disegnare il proprio ambiente Iconic.

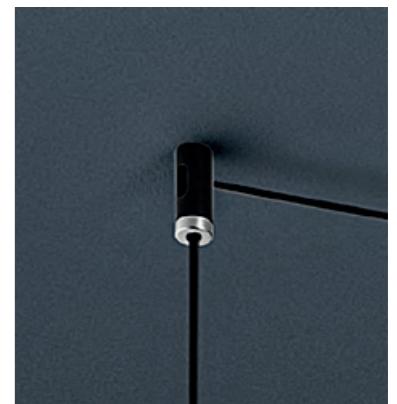

Configurable

Iconic was conceived as a basic element that can be inserted in multiple lighting solutions. In addition to the proposals in this catalog, you can create tailor-made combinations to design your own Iconic space.

Quid

Designer: Maurizio Betteto

“Lineare e funzionale”
“Linear and functional”

DESIGN In omaggio ad un rigore stilistico dato dalle forme sobrie del design contemporaneo è nata Quid, una collezione di lampade dalle linee squadrate ed essenziali.

PERSONALITÀ Volumi compatti per una illuminazione funzionale, con luce diretta e indiretta. Le due parti in alluminio sono separate da un elemento in plexiglass (PMMA) che si illumina intorno al perimetro, donando ulteriore leggerezza alla sua forma.

MAESTRIA La finitura in foglia oro è eseguita a mano su tutte le parti metalliche, donando a Quid l'unicità e la ricercatezza del «fatto a mano».

DESIGN Quid, a collection of lights with square clean-cut lines, is a tribute to the rigorous style created by the essential forms typical of modern design.

PERSONALITY Compact volumes for functional lighting, with direct and indirect light. The two aluminium parts are separated by a Plexiglas (PMMA) element that lights up around the perimeter, adding to the soft delicate effect of the design.

EXPERTISE The gold leaf finish is hand-done on all the metal parts, giving Quid the uniqueness and refined elegance typical of a handmade product.

Storie di riflessi

"Il riflesso è per i colori quello che l'eco è per i suoni."

(Joseph Joubert - Filosofo)

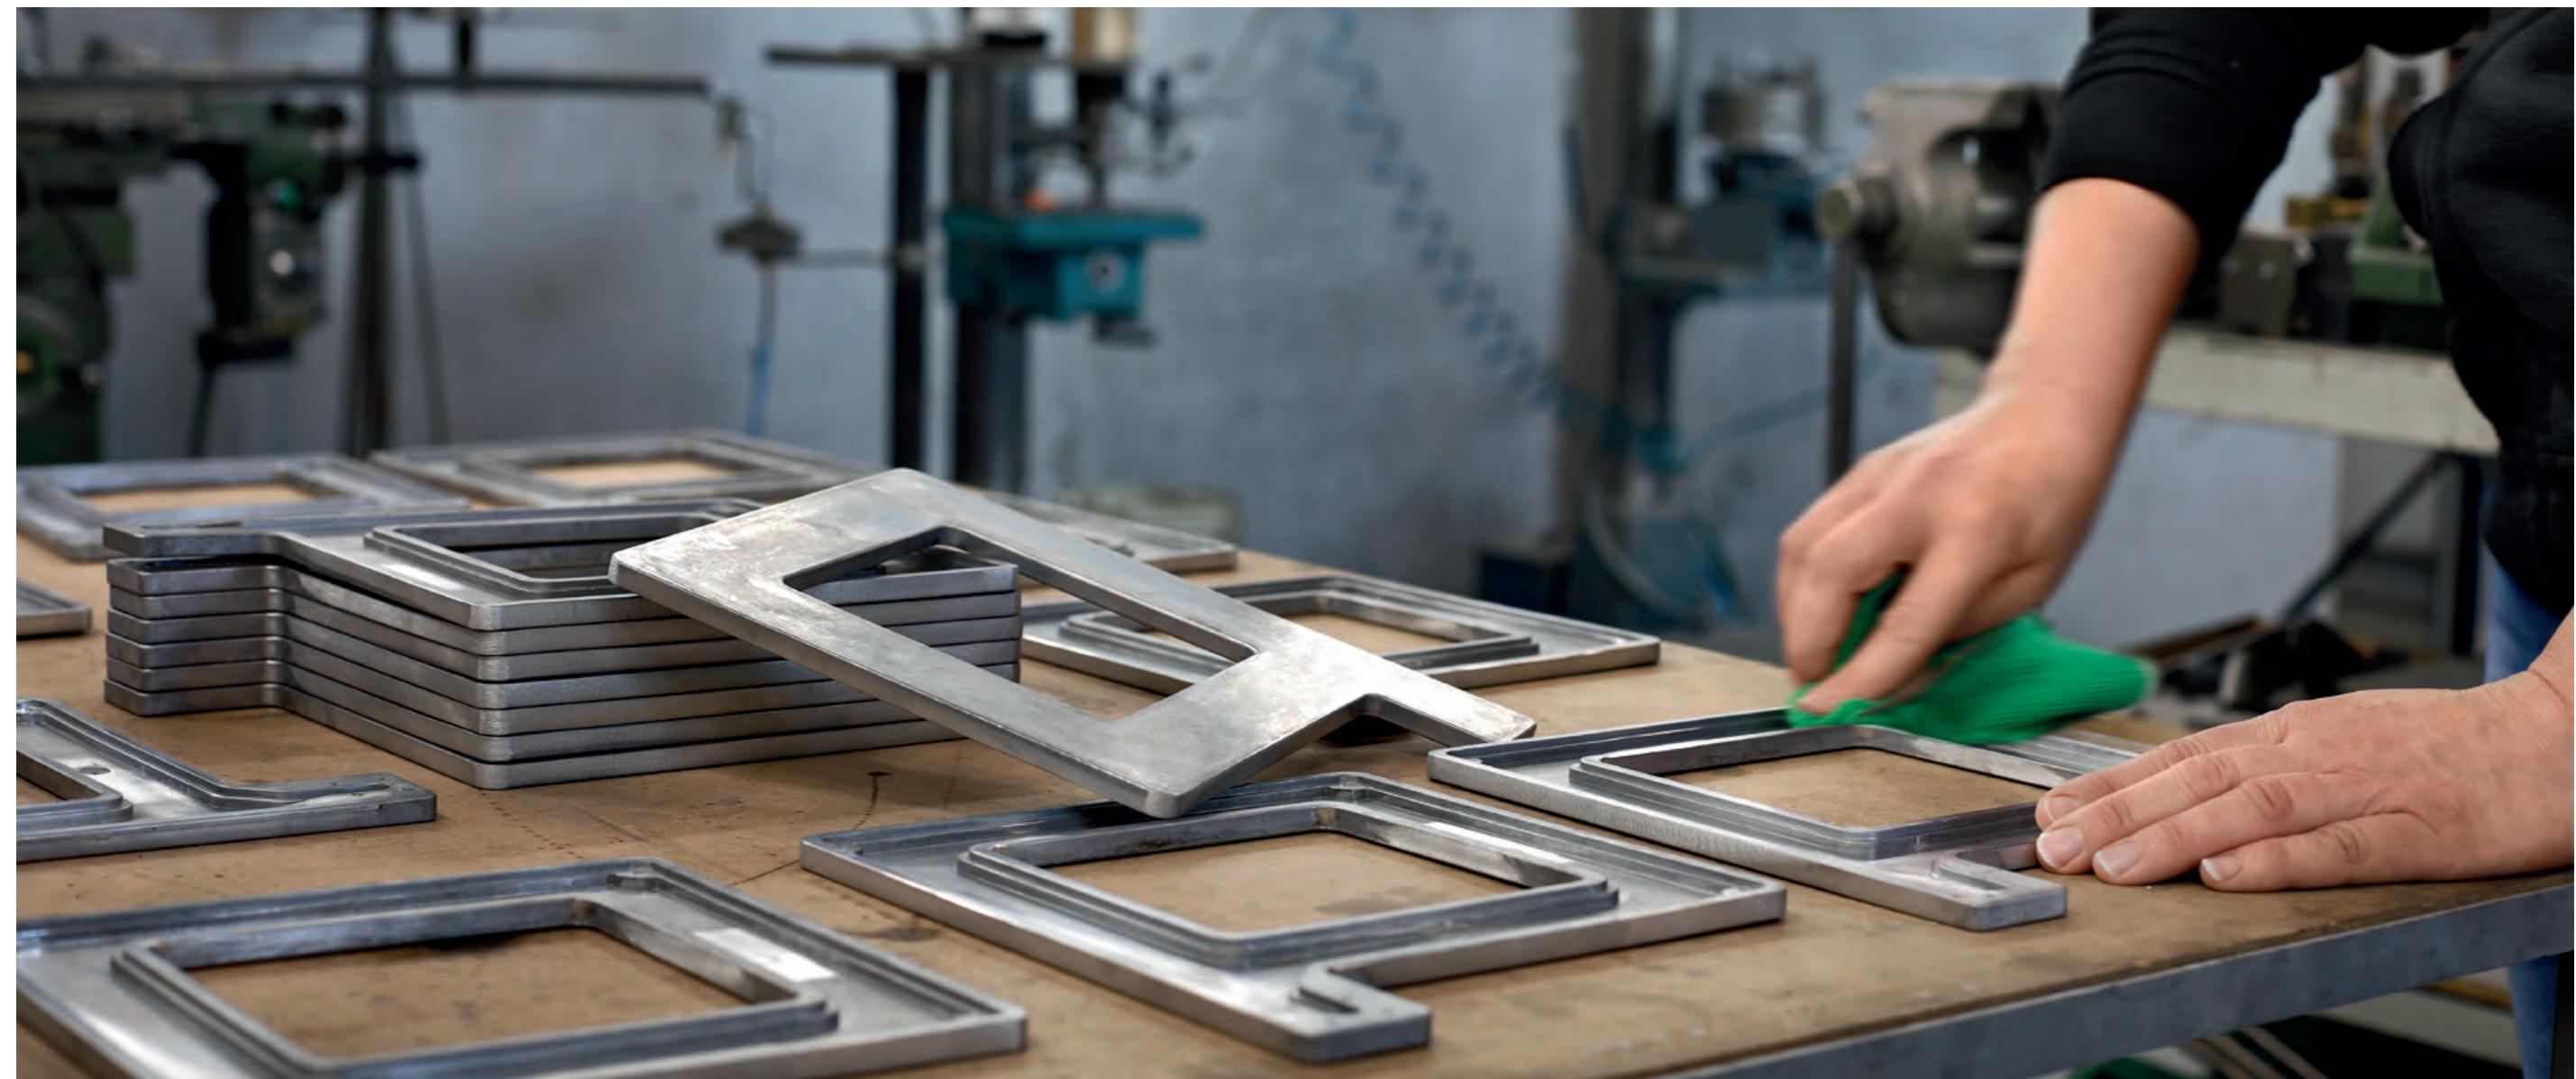

Stories of reflections

"Reflection is to colours what echo is to sounds."

(Joseph Joubert - Philosopher)

Luce riflessa è quell'effetto che si ottiene quando la luce colpisce una superficie lucida che la scomponete e la diffonde, creando effetti carichi di poesia. Storie di riflessi racchiudono lampade che sono oggetti di design che illuminandosi diffondono una luce avvolgente e morbida.

Light interacts with matter, creating phenomena through which objects are revealed to our eyes. Stories of Effects describe collections where light and matter create evocative effects, modelling the spaces they occupy. Here the story plot becomes an emotion waiting to be experienced.

LikeQ

Designer: Maurizio Betteto

“Proprio Come te”
“Just Like You”

DESIGN Forma semplice, senza spigoli, costruita con materiali nobili ma utilizzati in modo sobrio, e quel pizzico di sale per darci il giusto sapore: la dinamicità. Il movimento che consente di creare diversi effetti di luce, atmosfere che cambiano con un semplice tocco della mano.

PERSONALITÀ Le diverse combinazioni di colore conferiscono a Like Q una grande capacità di adattarsi ai diversi stili di arredamento. Il diffusore in vetro riflette la luce in modo morbido e avvolgente. L'alluminio riciclabile e il led integrato con LED-change system rendono LikeQ una lampada rispettosa dell'ambiente.

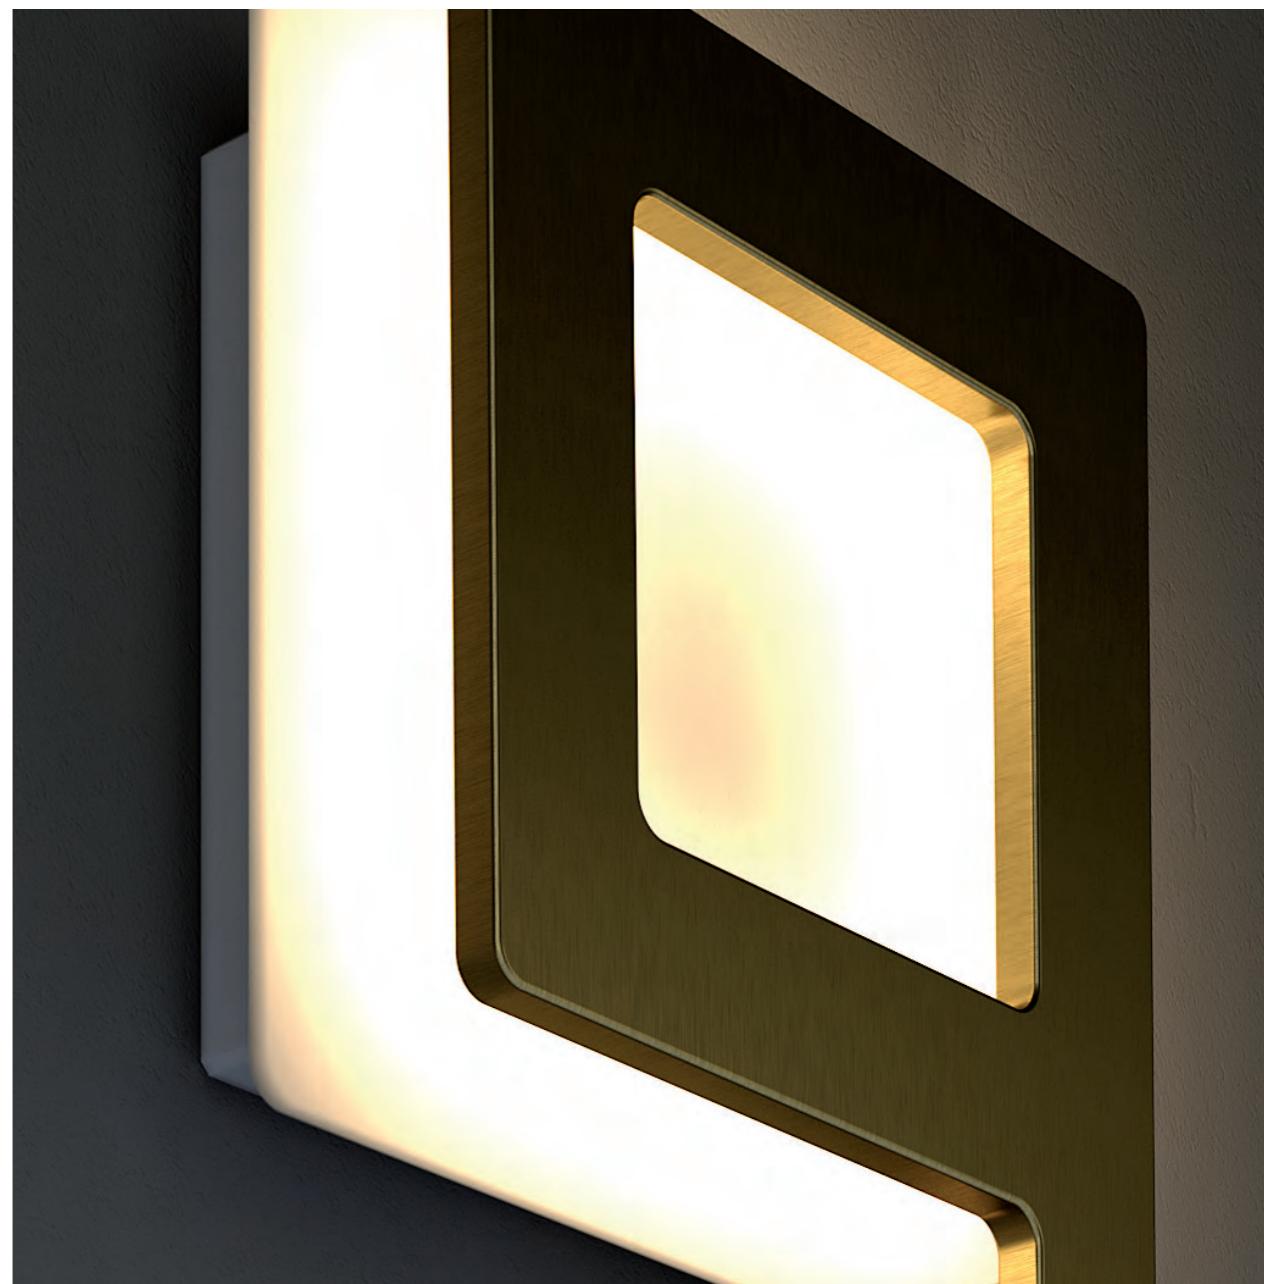

MAESTRIA Il vetro, che rimanda alla tradizione del territorio, è utilizzato come superficie riflettente perché diffonde la luce in modo omogeneo e morbido. La finitura in foglia oro sul vetro è eseguita a mano, donando a Like Q l'unicità e la ricercatezza del «fatto a mano».

DESIGN Essential shape, rounded corners, noble materials used simply and elegantly. The structure can be moved by a simple touch of the hand, creating different lighting effects and atmospheres, and adding a dynamic flavour.

PERSONALITY The different colour combinations give Like Q great scope for adapting to different furnishing styles. The glass reflector creates a soft suffused ambience. The recyclable aluminium and the integrated LED with green design system make Like Q an environment-friendly product.

EXPERTISE The glass, a reminder of local tradition, is used as a reflecting surface diffusing the light softly and uniformly. The gold leaf finish on the glass is hand-done, giving Like Q the uniqueness and refined elegance typical of a handmade product.

Real

Designer: Maurizio Betteto

“Un design a geometrie inverse”
“Inverse geometry design”

DESIGN Una forma decisa, nata da un gioco di geometrie tra materiali diversi: il vetro e l'alluminio. La collezione a led integrati illumina l'ambiente con luce indiretta e diffusa.

PERSONALITÀ Temperamento magnetico: Il diffusore in vetro è fissato con un sistema a calamite che consente una installazione rapida e agevole. Le linee morbide diventano elemento d'arredo che donano personalità all'ambiente, sia esso classico o contemporaneo.

MAESTRIA I due elementi in alluminio sono originate da una unica lastra di alluminio, tagliata al laser e sagomati secondo un design a geometrie inverse. Il vetro, che rimanda alla tradizione del territorio, è utilizzato come superficie riflettente perché diffonde la luce in modo omogeneo e morbido.

DESIGN A decisive form, resulting from a play of geometries between different materials: glass and aluminium. This integrated LED collection creates indirect diffuse lighting effects.

PERSONALITY Magnetic temperament: the glass reflector is fixed by a magnet system allowing quick easy installation. The soft lines become a furnishing element, giving the room personality, whether classic or contemporary.

EXPERTISE The two aluminium elements are obtained from one single aluminium sheet, laser cut and shaped according to an inverse geometry design. The glass, a reminder of local tradition, is used as a reflecting surface diffusing the light softly and uniformly.

Bemit

Designer: Maurizio Betteto

“L'incontro che illumina”
“A meeting that illuminates”

DESIGN Una forma geometrica semplice, la metafora di un abbraccio che crea luce. Il nome «Be Mit» nasce dalla fusione di due lingue (l'inglese «Be» e il tedesco «Mit») ed evoca l'incontro dato dai due bracci in metallo che generano la luce.

PERSONALITÀ Con la sua linea minimale si adatta agli spazi, donando eleganza e raffinatezza: la sua luce diffusa esalta i soffitti e la profondità dello spazio. Temperamento magnetico: il diffusore in vetro è fissato con un sistema a calamite che consente una installazione rapida e agevole.

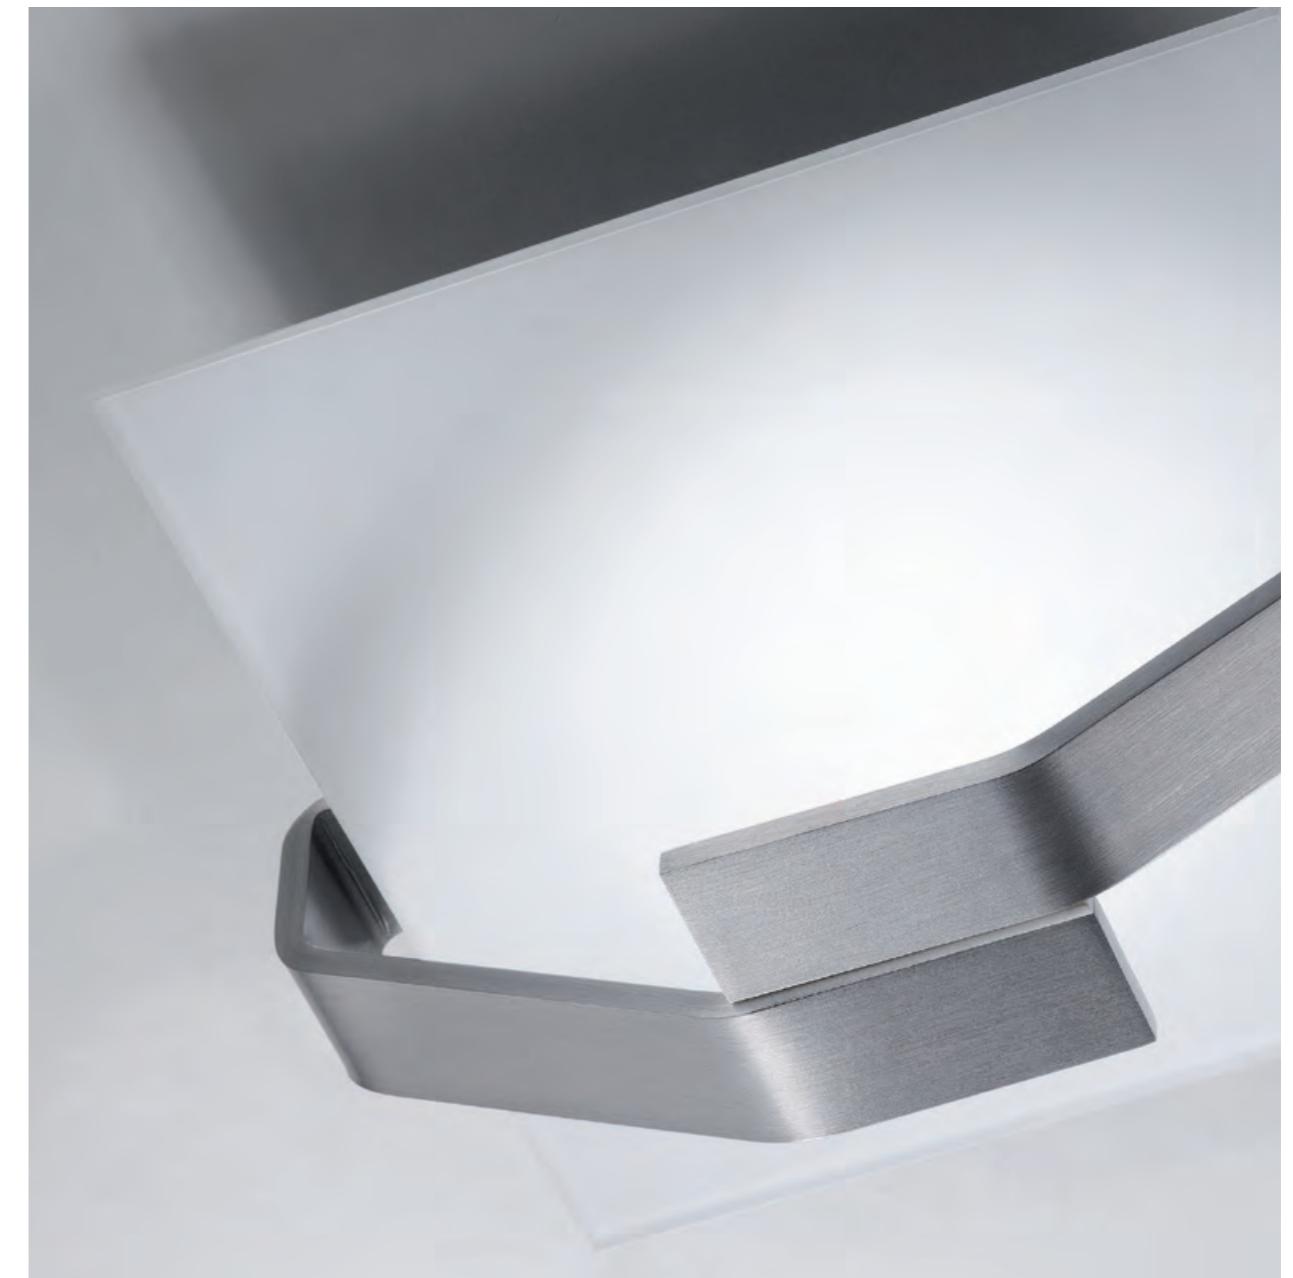

MAESTRIA Il vetro, che rimanda alla tradizione del territorio, è utilizzato come superficie riflettente che permette la diffusione di luce in modo omogeneo e morbido. La finitura in foglia oro sul vetro è eseguita a mano, donando a Bemit l'unicità e la ricercatezza del «fatto a mano».

DESIGN A simple geometric shape, the metaphor of an embrace that creates light. The name «Be Mit» is a fusion of two languages (the English «Be» and the German «Mit») and evokes the meeting of the two metal arms that generate the light.

PERSONALITY With its minimalist line it adapts to all spaces, adding elegance and refinement: the diffuse light enhances the ceiling and creates spatial depth. Magnetic temperament: the glass reflector is fixed by a magnet system allowing quick easy installation.

EXPERTISE The glass, a reminder of local tradition, is used as a reflecting surface diffusing the light softly and uniformly. The gold leaf finish on the glass is hand-done, giving Be Mit the uniqueness and refined elegance typical of a handmade product.

Rondaj

Designer: Elesi Creative Lab

“L’essenza della luce indiretta.”
“The essence of indirect light”

DESIGN Rondaj» è un termine in esperanto che significa «rotondo», una forma semplice che racchiude un illuminazione a led integrati ad alta efficienza. La lampada da terra illumina con luce riflessa, verso l’alto, e diretta, verso il basso, regolate separatamente da memory touch dimmer posti sul fusto.

PERSONALITÀ La luce diffusa è adatta per esaltare i soffitti e la profondità dello spazio. Attenta al comfort visivo, la lampada da terra è ideale per i momenti di relax.

MAESTRIA La cura nel dettaglio si esprime nelle finiture acciaio e oro francese attraverso la spazzolatura del metallo eseguita completamente a mano. Quell’artigianalità che conferisce unicità a ciascuna lampada.

DESIGN Rondaj» is an Esperanto term meaning «round», a simple shape that encloses a high efficiency integrated LED lighting element. The floor lamp version illuminates upwards by reflected light and downwards by direct light, adjusted separately by memory touch dimmers located on the stem.

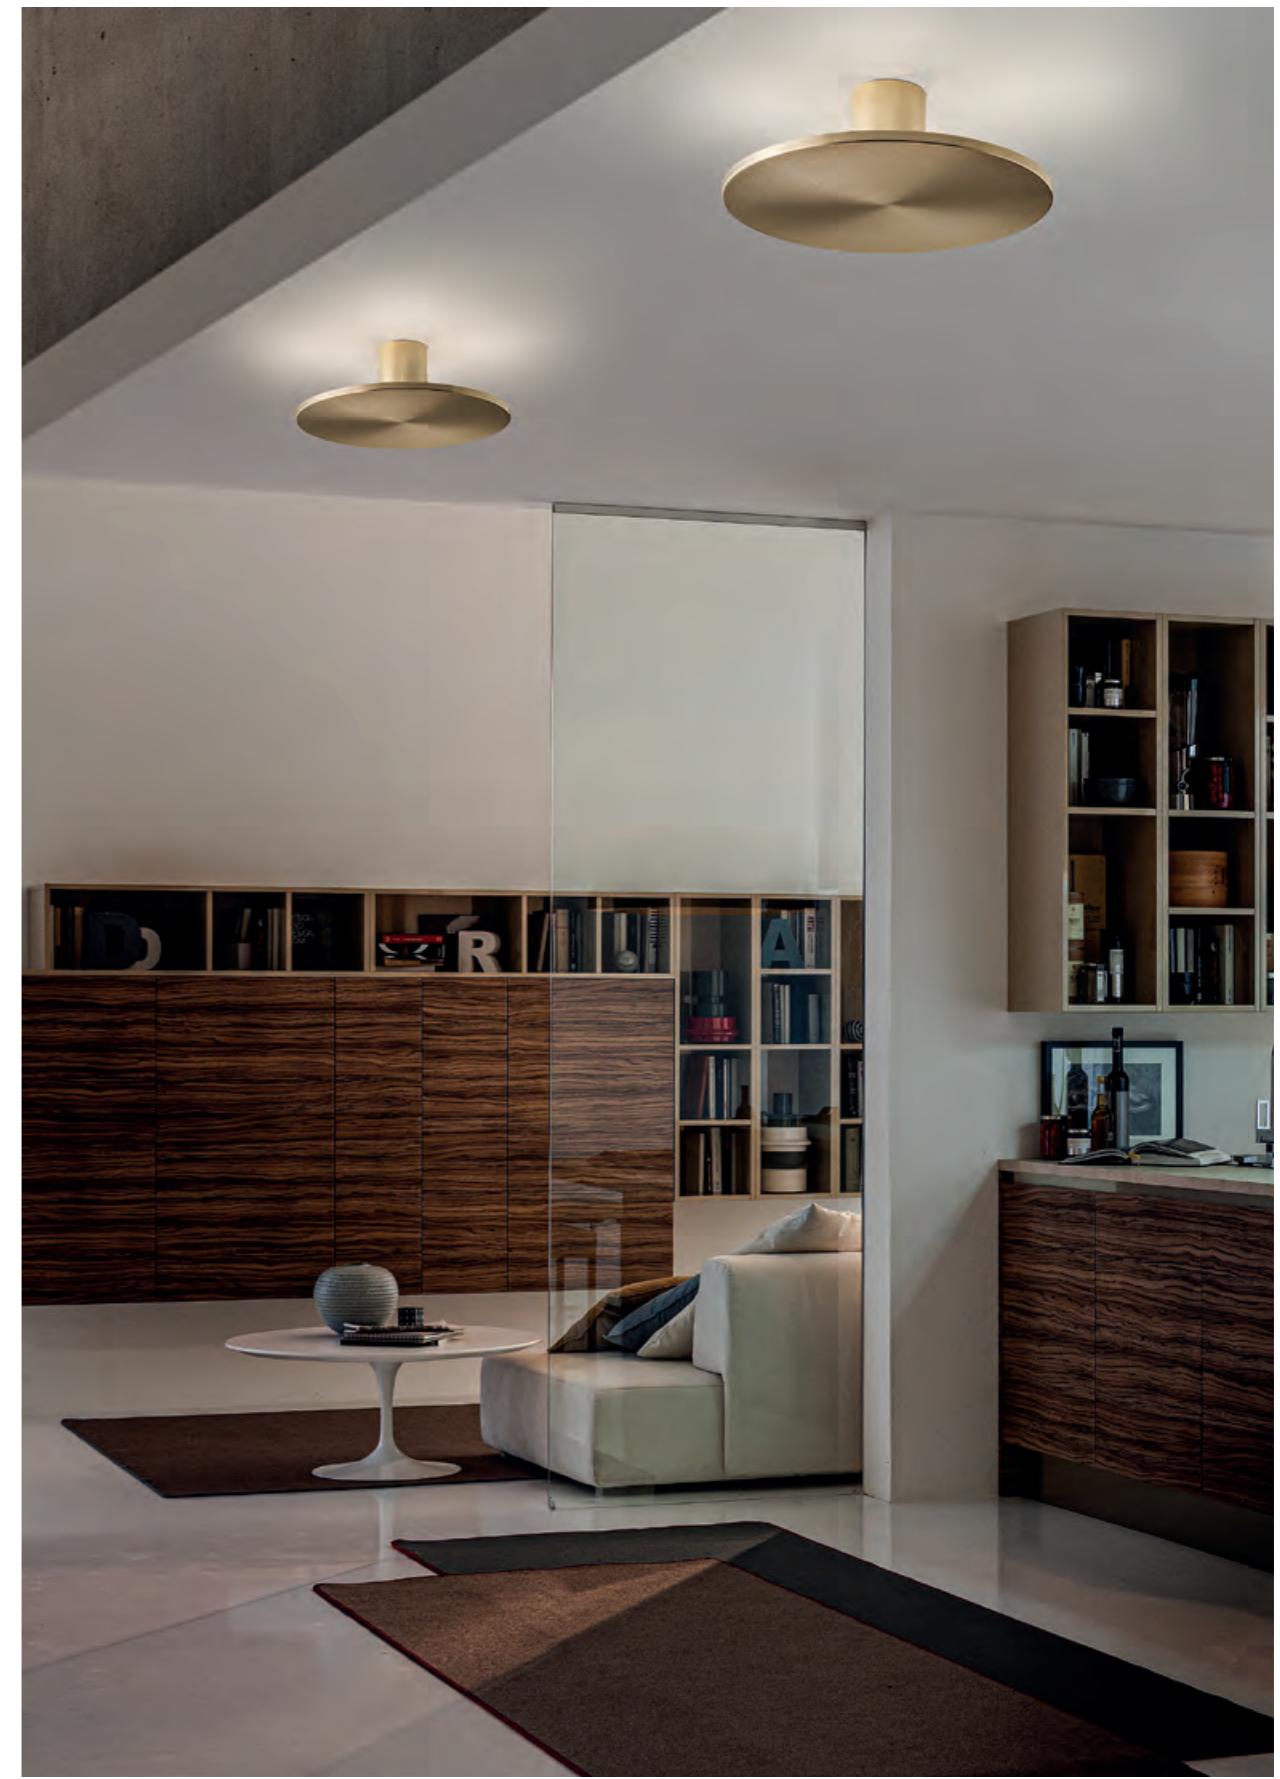

PERSONALITY Diffuse light enhances the ceiling and creates spatial depth. The floor lamp is designed with visual comfort in mind, and is ideal for moments of relaxation.

EXPERTISE Attention to detail can be seen in the steel and French gold finishes, with the metal brushing done 100% by hand. An artisan touch that makes each lamp unique.

Sotto una nuova Luce

In a new light

Design semplice per una collezione a luce riflessa. Plafoniere e lampade da terra a una luce indiretta per il comfort visivo che ben si adatta a ogni tipo di ambiente.

*Round shapes for a collection with reflected light.
Ceiling lamp and floor lamp with indirect light for a visual comfort that fits well in any environment.*

Storie di trasparenze

*"Più la scrittura è trasparente
e più la poesia è visibile."*

(Gabriel García Márquez - Scrittore)

Stories of transparencies

*"The more transparent the writing,
the more visible the poetry."*

(Gabriel García Márquez - Writer)

La trasparenza è la capacità di un corpo di permettere il passaggio, attraverso il suo spessore, di immagini e luce. Questa caratteristica diventa stimolante per ideare oggetti unici. Storie di Trasparenze sono delle collezioni nate dalla nostra passione per i materiali e per le forme innovative: lampade che giocano con la luce e diventano protagoniste dello spazio che le ospita.

Transparency is the ability of a body to allow the passage of images and light through it. This characteristic is a stimulus for creating unique objects. Stories of Transparencies are collections born of our passion for materials and innovative forms: lamps that play with the light and become key players in the space they occupy.

Air

Designer: Maurizio Betteto

“Una poesia scritta nell’aria.”
“A poem written in the air.”

DESIGN Ricerca dei materiali e volontà di esaltare la bellezza della luce. E' questo che ha portato alla creazione di questa collezione di grande effetto e luminosità. Il design ha un'anima di metallo e la struttura in plexiglass (PMMA) con lavorazione di micro-puntinatura che permette una maggiore diffusione della luce.

PERSONALITÀ Leggerezza, essenzialità nelle forme e accurato accostamento dei materiali. Una silenziosa presenza che accesa rivela la sua personalità e vivacità. Le due tipologie di luce led (diffusa e direzionale), in combinazione consentono una illuminazione omogenea dello spazio.

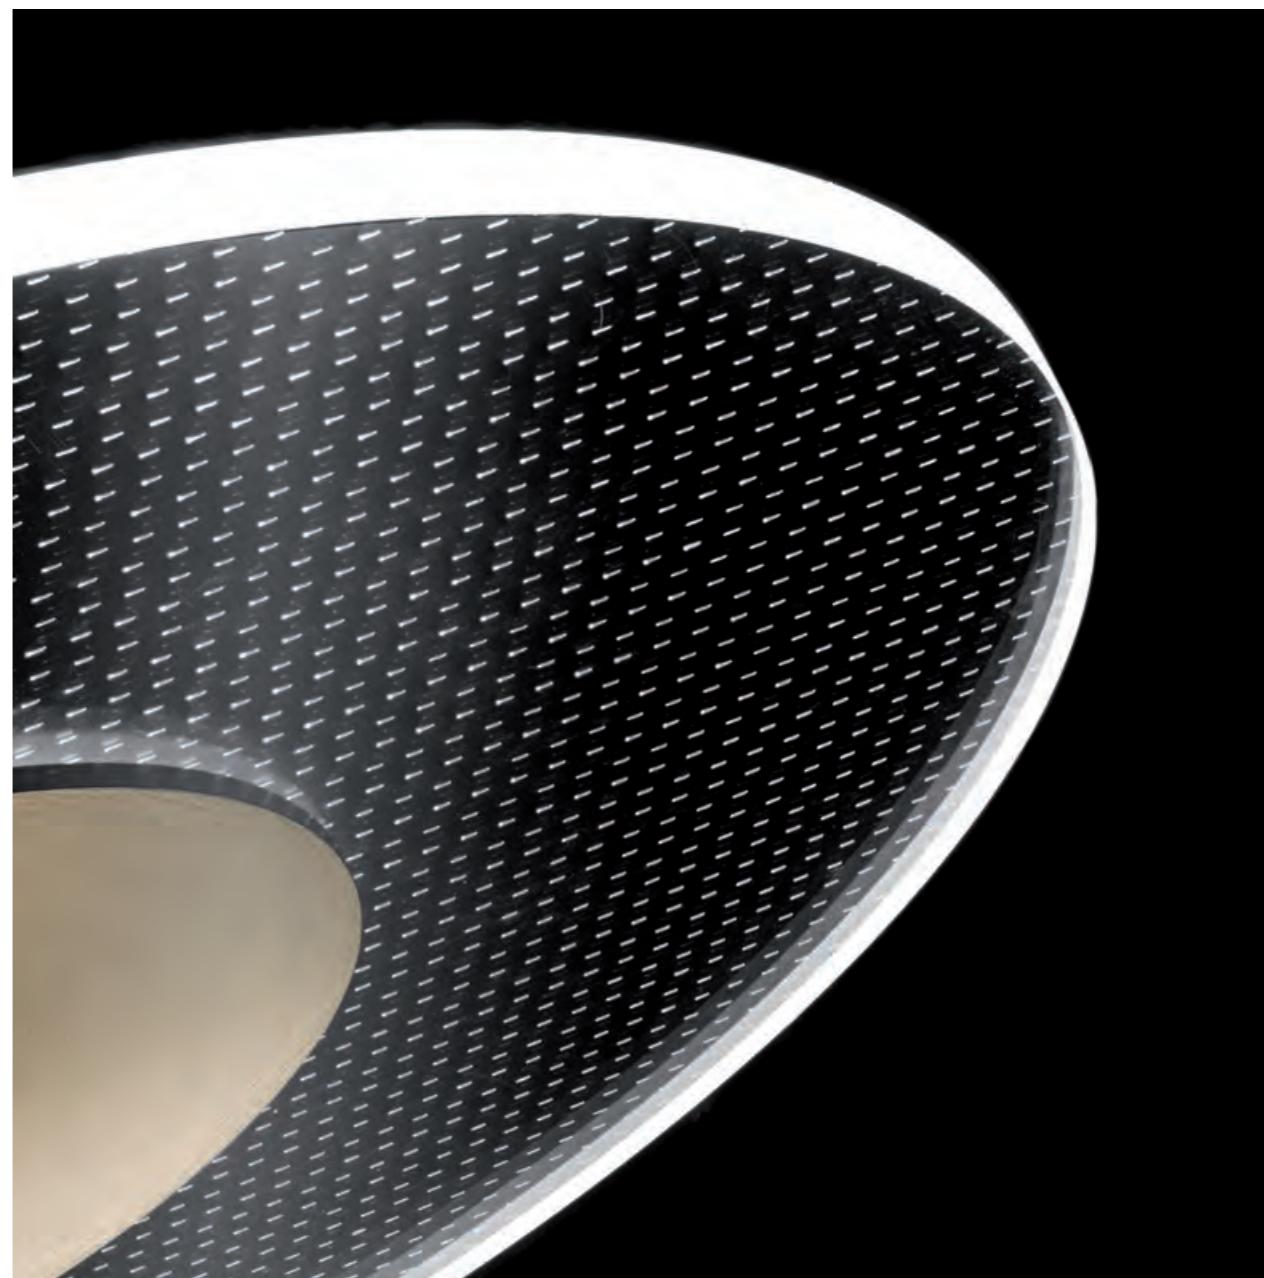

MAESTRIA Per perfezionare la luminosità del materiale PMMA ogni pezzo viene lucidato a mano, mentre il bordo viene satinato per avere lungo il perimetro un effetto morbido di luce.

DESIGN The quest for refined materials and the desire to enhance the beauty of light. These are the two elements underlying this collection which creates an effect of great luminosity. The design has a metal core and Plexiglas (PMMA) structure with stippled pattern for greater light diffusion.

PERSONALITY Lightness, simple shapes and careful combination of materials. A silent presence that reveals a lively personality when switched on. The two types of LED light (diffuse and directional) combine to create a uniform lighting effect.

EXPERTISE To perfect the luminosity of the PMMA material, each piece is hand-polished, and the edge is satin-finished for a soft light effect around the perimeter.

Tour

Designer: Elesi Creative Lab

“La luce che diventa scultura aerea”
“Light becomes an aerial sculpture”

DESIGN Elementi a forma circolare che si intersecano sospesi nello spazio: la struttura è in alluminio con diffusore in plexiglass (PMMA) trasparente con lavorazione a micro-puntinatura che permette una migliore diffusione della luce.

PERSONALITÀ A luce spenta, la sua struttura si integra nell'ambiente diventando scultura aerea. In modalità «on» diventa l'indiscussa protagonista. La luce si fa struttura, evocata da un design minimale e leggero.

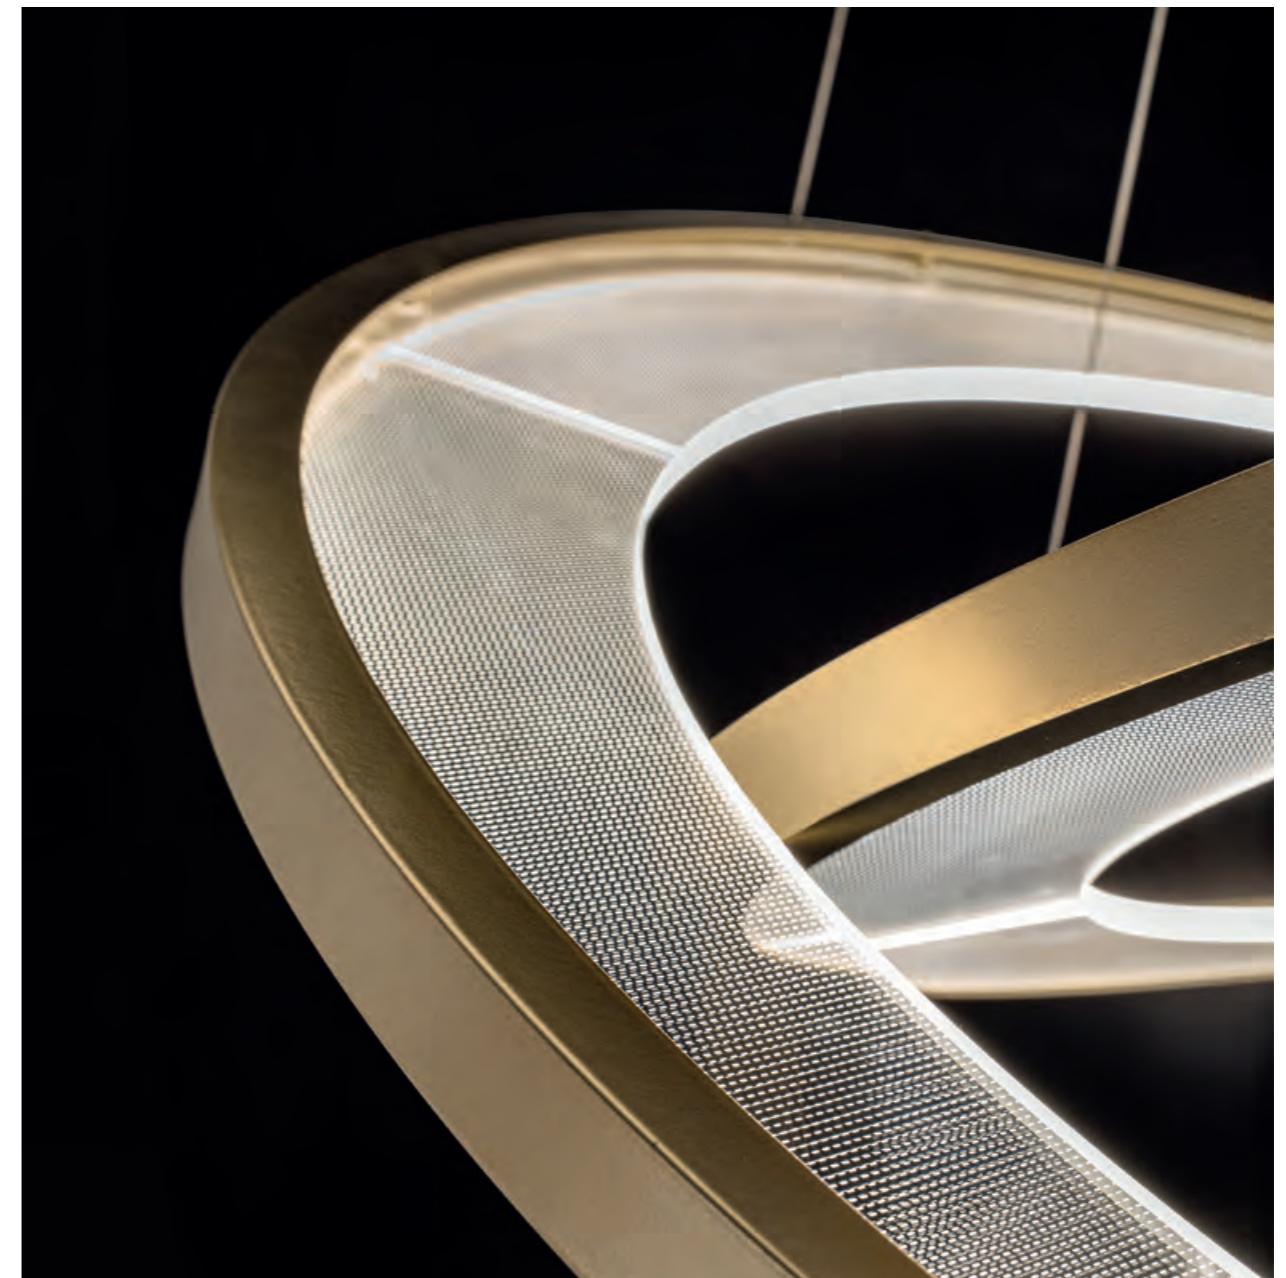

MAESTRIA Per perfezionare la luminosità del materiale PMMA ogni pezzo viene lucidato a mano, successivamente il bordo viene satinato per avere lungo il perimetro un effetto morbido di luce.

DESIGN Intersecting circular elements suspended in space: the structure is made of aluminium with transparent Plexiglas (PMMA) reflector featuring stippled pattern for greater light diffusion.

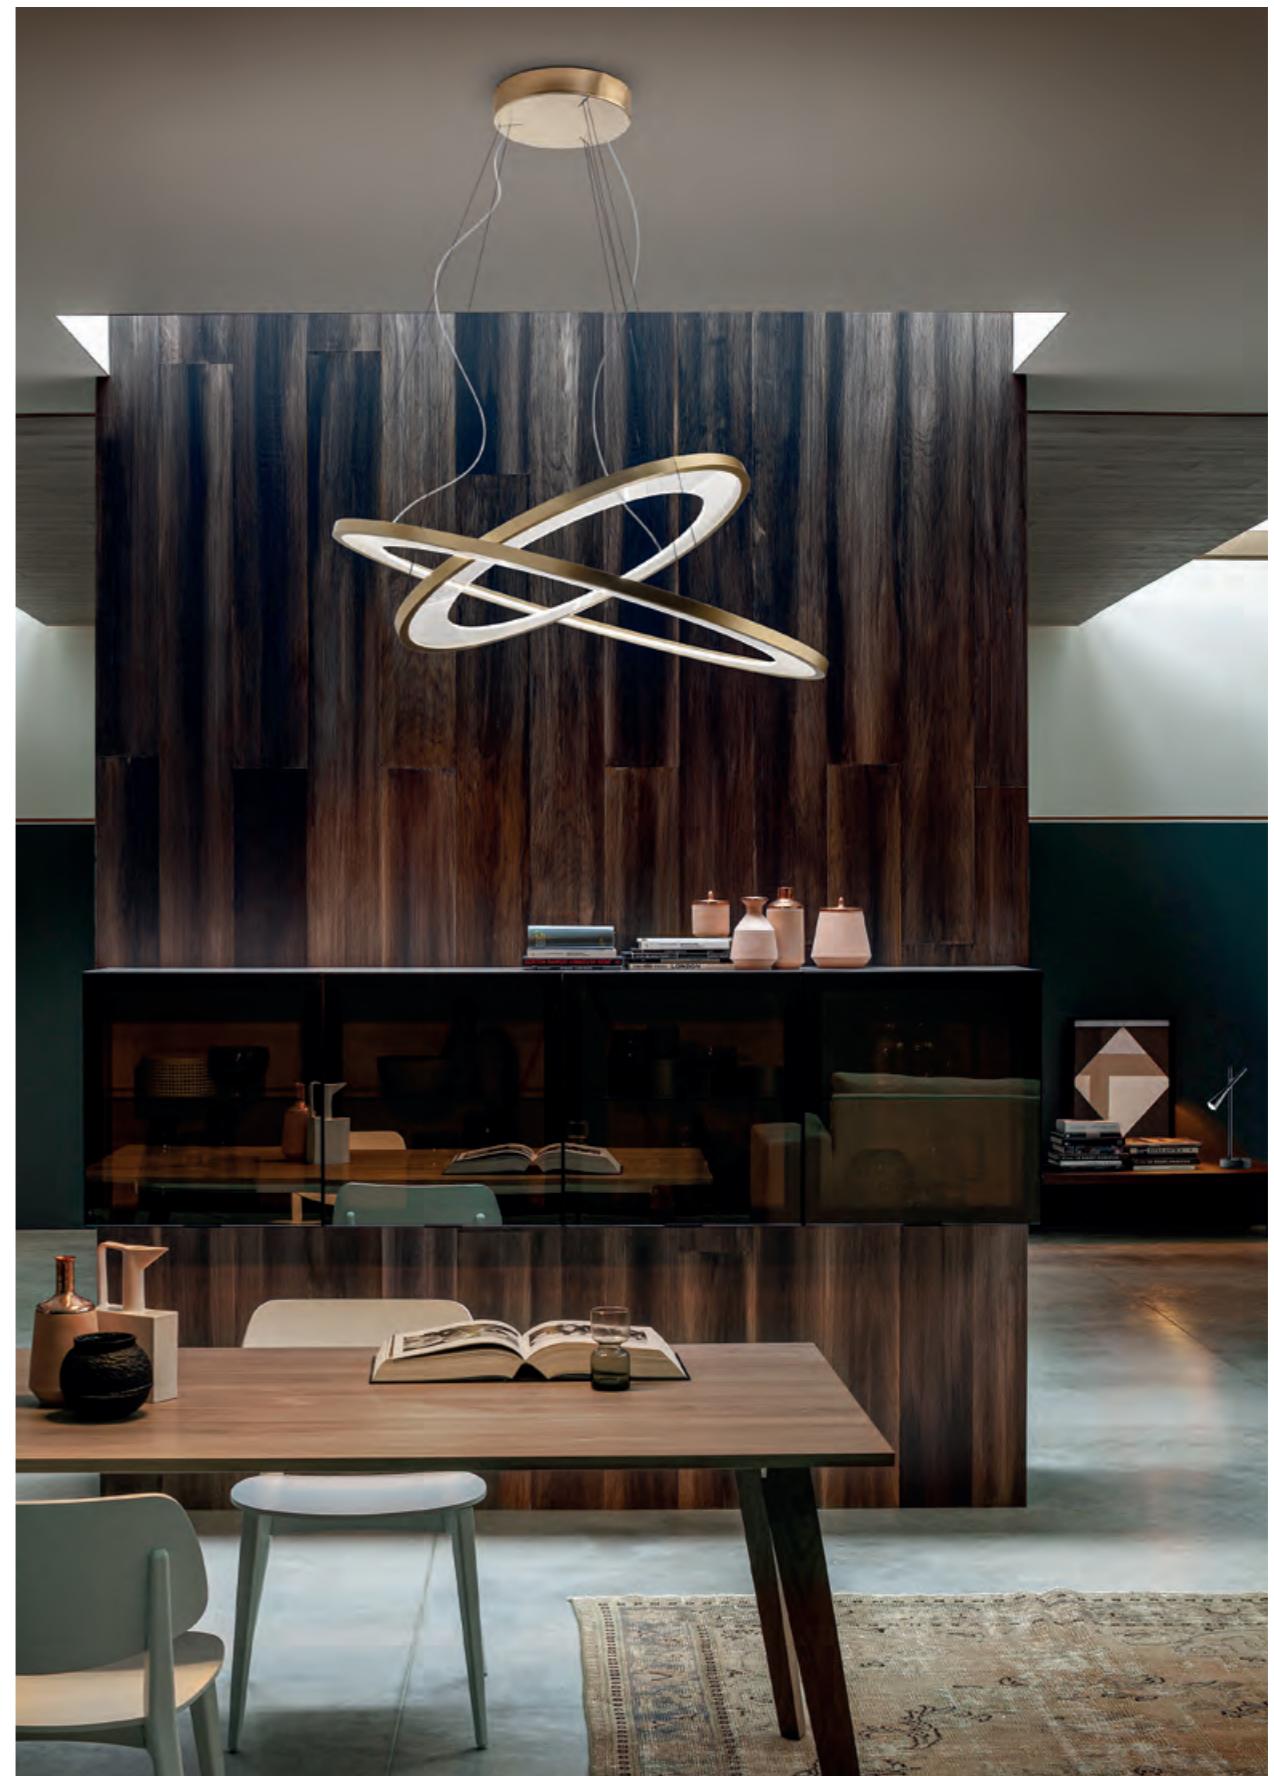

PERSONALITY With the light off, its structure blends into the surroundings, becoming an aerial sculpture. When on, it becomes the undisputed star. The light takes shape, highlighted by a slim minimalist design.

EXPERTISE To perfect the luminosity of the PMMA material, each piece is hand-polished, and the edge is satin-finished for a soft light effect around the perimeter.

Versailles

Designer: Architetto Paolo Francia

“L’interpretazione innovativa del classico”
“Innovative interpretation of a classic”

DESIGN La collezione è l’interpretazione innovativa del classico, attraverso l’utilizzo di materiali ricercati e forme nuove. L’alluminio si abbina con il plexiglass (PMMA) con lavorazione a micro-puntinatura che permette una migliore diffusione della luce. Tutta la lampada è un esaltazione di luce, e tutto l’intero braccio diventa sorgente luminosa.

PERSONALITÀ Pur richiamando il concetto classico di lampadario, Versailles è una lampada moderna e innovativa: presente e passato si fondono in un oggetto luminoso che diviene il protagonista dell’ambiente che lo ospita.

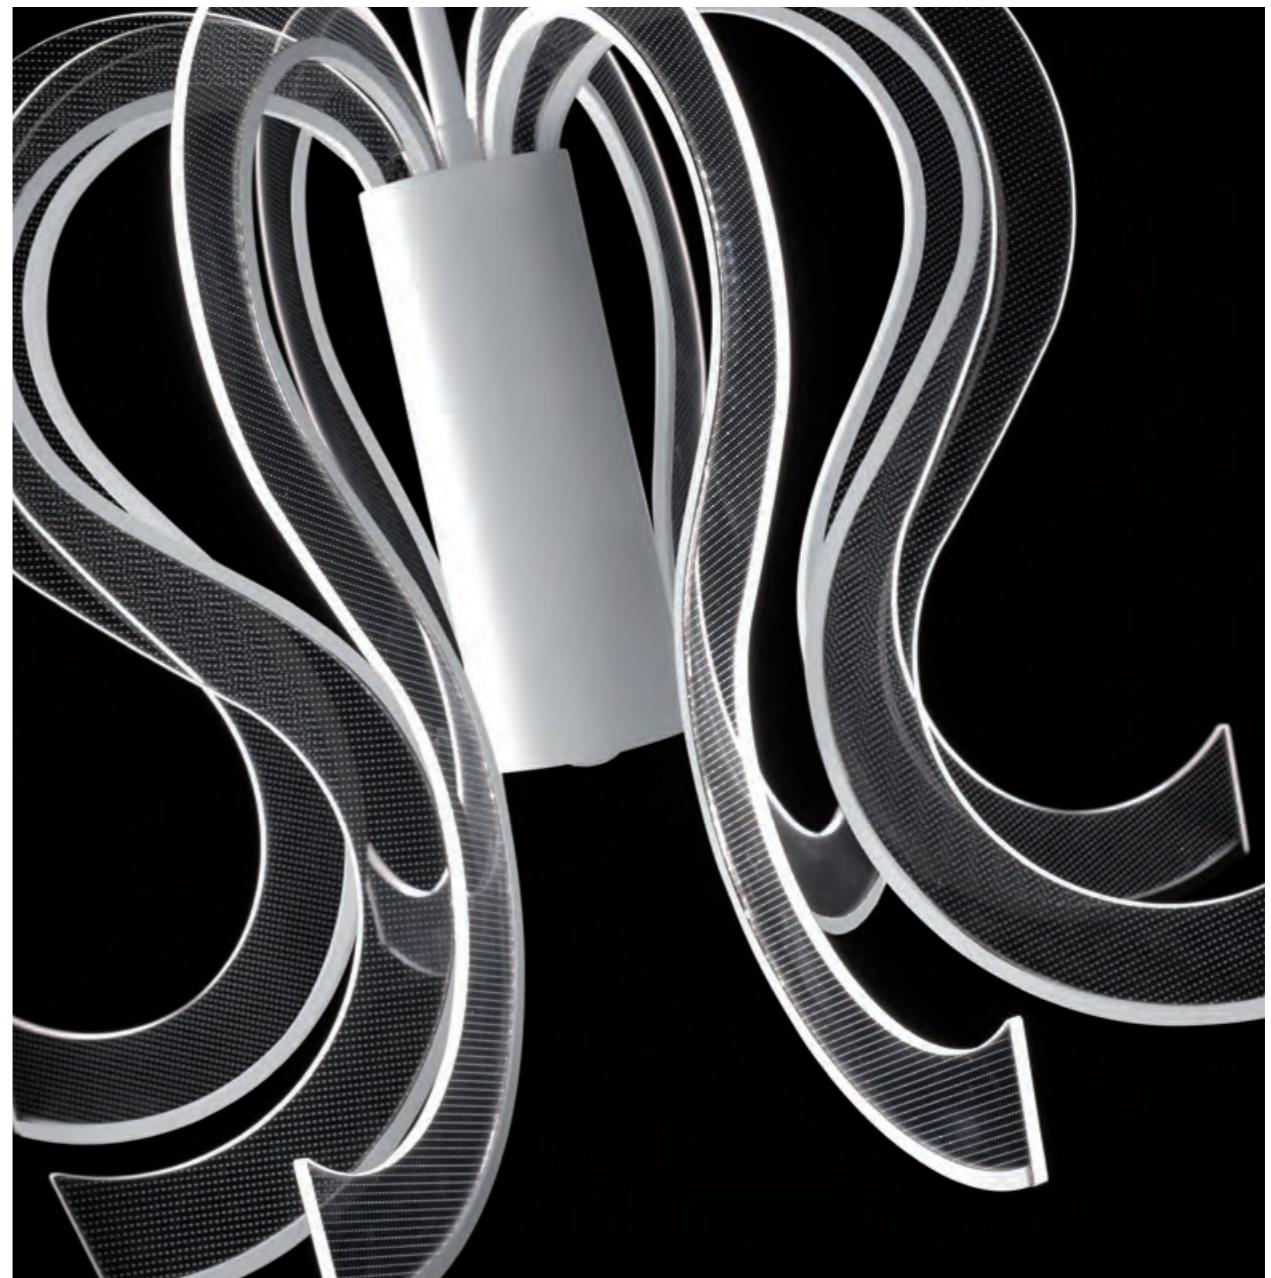

MAESTRIA Traendo ispirazione dai classici lampadari veneziani, in Versailles le braccia si connettono e si innestano rapidamente in fase di installazione per rendere più semplice e sicuro il trasporto e la messa in opera.

DESIGN The collection is an innovative interpretation of the classic chandelier, using refined materials and new forms. The aluminium combines with the transparent Plexiglas (PMMA) with stippled pattern for greater light diffusion. The whole product is a celebration of light, the arm becomes a light source.

PERSONALITY While evoking the classic chandelier, Versailles is a modern innovative light: present and past blend in a luminous object that becomes the focal point of the whole room.

EXPERTISE Drawing inspiration from the classic Venetian chandeliers, in Versailles the arms are fitted during installation to facilitate and ensure safe transport.

Storie di alchimie

"La cosa più bella che possiamo sperimentare è il mistero; è la fonte di ogni vera arte e di ogni vera scienza"

(Albert Einstein - fisico)

Stories of alchemy

"The most beautiful thing we can experience is the mysterious. It is the source of all true art and science."

(Albert Einstein - physicist)

Il vetro è alchimia, una fusione simultanea dei 4 elementi: il vetro è trasparente come l'aria, fluido come l'acqua, caldo come il fuoco che lo fonde e, alla fine, duro come la terra in cui nasce. Storie di Alchimie sono collezioni che raccontano di questo materiale ricco, vivo e nobile, caratteristico del nostro territorio. Protagonista, assieme alla luce, delle lampade di queste collezioni.

Glass is alchemy, a simultaneous fusion of the 4 elements: glass is transparent like air, fluid like water, hot like the fire that melts it and, in the end, hard like the earth from where it originates. Stories of Alchemies are collections that illustrate this rich, living noble material, which is also a centuries-old local tradition. Together with light, glass is the key feature of the lamps in these collections.

Pois

Designer: Elesi Creative Lab

“Parabole di grande magnetismo”
“Magnetic appeal”

DESIGN Nella collezione Pois il design sobrio delle forme e l'innovazione tecnologica si uniscono in un risultato vincente: un'unica lastra di vetro piano con abbassamenti eseguiti a caldo e un sistema di fissaggio magnetico, veloce, semplice e senza viti a vista.

PERSONALITÀ La forma geometrica della lampada è addolcita dai bassorilievi eseguiti in fusione a caldo del vetro. Essenziale, ma accattivante, possiede forte personalità grazie a questi dettagli che la rendono unica.

MAESTRIA Il vetro, che rimanda alla tradizione del territorio, può essere decorato in foglia oro, lavorazione artigianale che dona a Pois l'unicità e la ricercatezza del «fatto a mano».

DESIGN In the Pois collection, simple shapes and technological innovation combine for a winning result: one single sheet of flat glass, with hot-pressed indentations, and a simple quick magnetic fastening system, with no visible screws.

PERSONALITY The geometric shape of the light is softened by the hot-pressed indentations of the glass. Simple but eye-catching, it has a strong personality thanks to these details that make it unique.

EXPERTISE The glass, a reminder of local tradition, can be decorated in gold leaf, an artisan technique that gives Pois the uniqueness and refined elegance of a handmade product.

Nel 2019 POIS è stata insignita del VSL Award con le seguenti motivazioni: la lampada unisce la tradizione della lavorazione del vetro e una funzionalità non gratuita di linee stilizzate e pure.

Leggerezza ed equilibrio declinati in un materiale prezioso, con parabole di grande magnetismo e armonia.

In 2019 POIS received the VSL Award for the following reasons: the light combines glass working tradition with the wholly appropriate functionality of pure stylized lines.

Lightness and equilibrium expressed in a precious material, with effects of great magnetism and harmony.

Aura

Designer: Elesi Creative Lab

“Linee di luce che disegnano il vetro”
“Glass designed by lines of light”

DESIGN Nella collezione Aura la bellezza del vetro si esalta nei colori e nella materia utilizzata. Il vetro è ricavato da una unica lastra e il suo design rimane integro, senza fori o tagli. L'effetto delle linee è dato dall'accostamento di lavorazioni diverse sul vetro.

PERSONALITÀ Il vetro colorato è interrotto da linee satinate che permettono il passaggio della luce e diventano elementi distintivi. Temperamento magnetico: Il diffusore in vetro è fissato con un sistema a calamite che consente una installazione rapida e agevole.

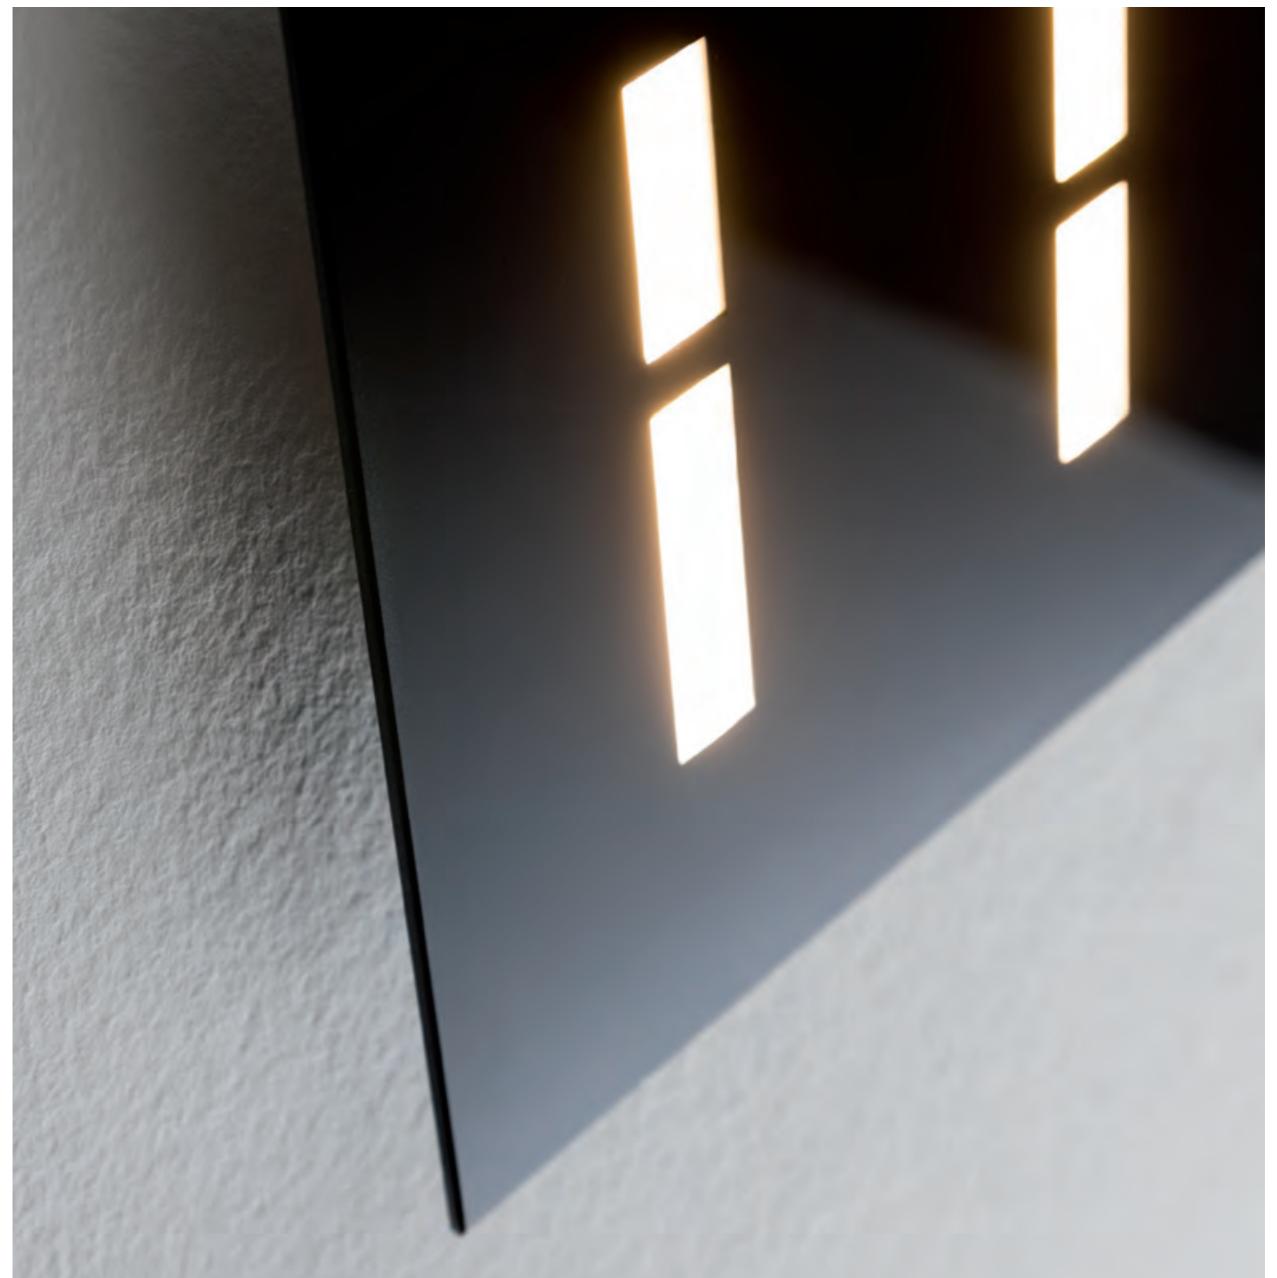

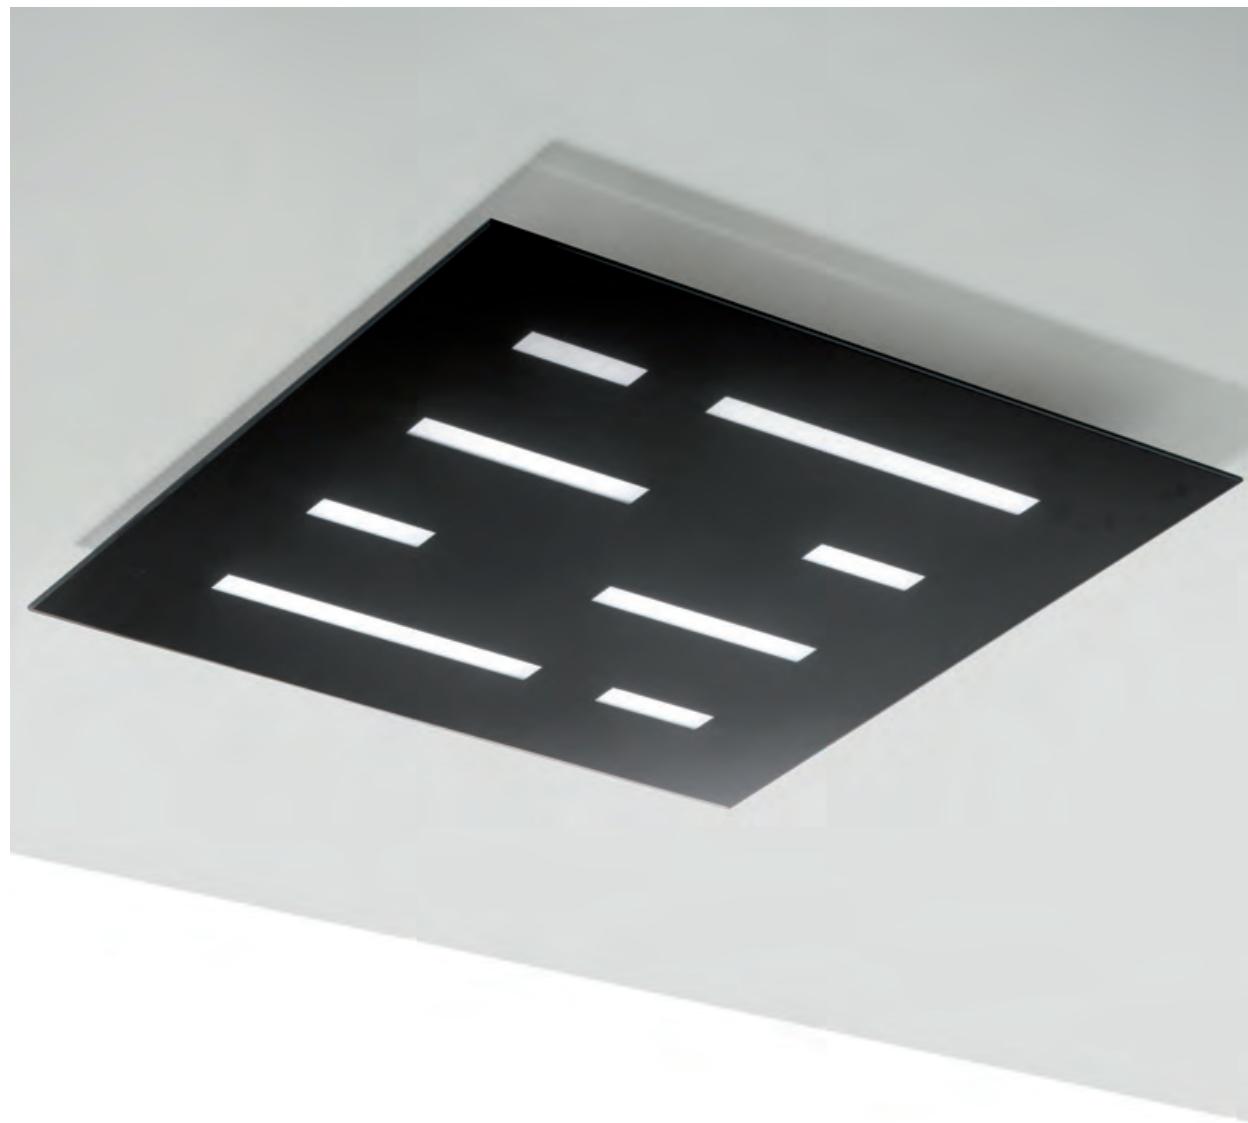

MAESTRIA L'unicità è nel vetro che racchiude diverse lavorazioni artigianali: le decorazioni del vetro sono eseguite a mano da abili artigiani del territorio donando ad Aura l'unicità e la ricerchezza del «fatto a mano».

DESIGN In the Aura collection the beauty of the glass is enhanced by the colours and material used. The glass is obtained from one single sheet, without holes or cuts. The effect of the lines is created by the combined use of different work techniques on the glass.

PERSONALITY The coloured glass is interrupted by satin-finish lines that allow passage of the light and become distinctive elements. Magnetic temperament: the glass reflector is fixed by a magnet system which allows quick easy installation.

EXPERTISE The unique element of this lighting product is the glass which features different artisan techniques: the glass decorations are hand-done by skilled local craftsmen, giving Aura the uniqueness and refined elegance of a handmade product.

Storie di accenti

*"La Luce deve cadere
come un sasso."*

(Josef Svoboda- Scenografo)

Stories of accents

*"Light must drop
like a stone."*

(Josef Svoboda - Stage designer)

Così come nella scrittura l'Accento è un rafforzamento o elevazione del tono con cui si dà a una sillaba maggior rilievo rispetto ad altre della stessa parola, così in illuminotecnica la luce d'accento serve per far risaltare un particolare, un oggetto, un elemento nello spazio. Storie di Accenti raccontano di lampade spot che trasformano la luce in volume creando dei coni luminosi che mettono in evidenza gli oggetti sui quali si posano.

In writing, an accent intensifies or highlights the tone, giving a syllable greater emphasis than others in the same word; in the same way, in lighting an accent light serves to bring out a detail, an object or an element in space. Stories of Accents describe spotlights that transform the light into volume, creating bright cones of light that focus on specific objects.

Piston

Designer: Elesi Creative Lab

“Evidenzia lo spazio che ami”
“Highlight the space you love”

DESIGN Il nome evocativo in meccanica è stato attribuito per le prestazioni illuminotecniche della lampada. Una Collezione di spot orientabili da soffitto e parete che permettono di direzionare la luce esattamente dove serve. A questo scopo ciascuna lampada è dotata di snodo che consente la rotazione a 360° e il movimento a 90°.

PERSONALITÀ Piston trasforma la luce in volume creando dei coni luminosi che mettono in evidenza gli oggetti sui quali si posano. La luce taglia gli spazi seguendo la direzione dello spot in un gioco di volumi in chiaro scuro.

MAESTRIA La cura nel dettaglio esprime nelle finiture acciaio e oro francese attraverso la spazzolatura del metallo eseguita completamente a mano. Quell'artigianalità che conferisce unicità a ciascuna lampada.

DESIGN The name refers not only due to the shape of this light but also to its lighting performance. A collection of adjustable ceiling and wall spotlights that allow you to direct the light exactly where needed. For this purpose, each light is provided with a joint for 360° rotation and 90° movement.

PERSONALITY Piston transforms light into volume, creating cones of light to highlight individual objects. The light cuts through space following the direction of the spot in a play of chiaroscuro volumes.

EXPERTISE Attention to detail can be seen in the steel and French gold finishes, with the metal brushing done 100% by hand. Craftsmanship that makes each product unique.

“Versatilità e confort visivo”
“Versatility and visual comfort”

DESIGN Una Collezione di spot orientabili che permettono di direzionare la luce esattamente dove serve. A questo scopo ciascuna lampada è dotata di snodo che consente la rotazione a 360° e il movimento a 90° o di tubo flessibile.

PERSONALITÀ Per le sue caratteristiche è ottimale come luce d'accento, per illuminare dettagli ed oggetti. Come lampada da lettura mette in luce lo spazio desiderato, creando in giusto comfort visivo.

MAESTRIA La cura nel dettaglio si esprime nelle finiture in acciaio e oro francese che attraverso la spazzolatura del metallo, eseguita completamente a mano conferisce alla lampada l'artigianalità che la rende unica.

DESIGN A collection of adjustable spotlights that allow you to direct the light exactly where needed. For this purpose, each lamp is provided with a joint for 360° rotation and 90° movement, or with a flexible tube.

PERSONALITY Ideal for accent lighting, to light details and objects. As a reading light, it highlights the desired area, ensuring visual comfort.

EXPERTISE Attention to detail can be seen in the steel and French gold finishes, with the metal brushing done 100% by hand. Craftsmanship that makes each product unique.

DOC

Designer: Elesi Creative Lab

“Funzionalità e praticità”
“Functionality and practicality”

DESIGN Progettata come lampada da lettura, studio e lavoro consente di orientare la luce secondo le proprie necessità, regolando l'intensità con memory touch dimmer. Dotata di 3 snodi, mette in luce lo spazio desiderato creando il giusto comfort visivo.

PERSONALITÀ Stabile, maneggevole, funzionale. Doc è semplicemente pratica, una lampada che offre una soluzione rapida per illuminare il piano di lavoro, la scrivania, l'angolo relax.

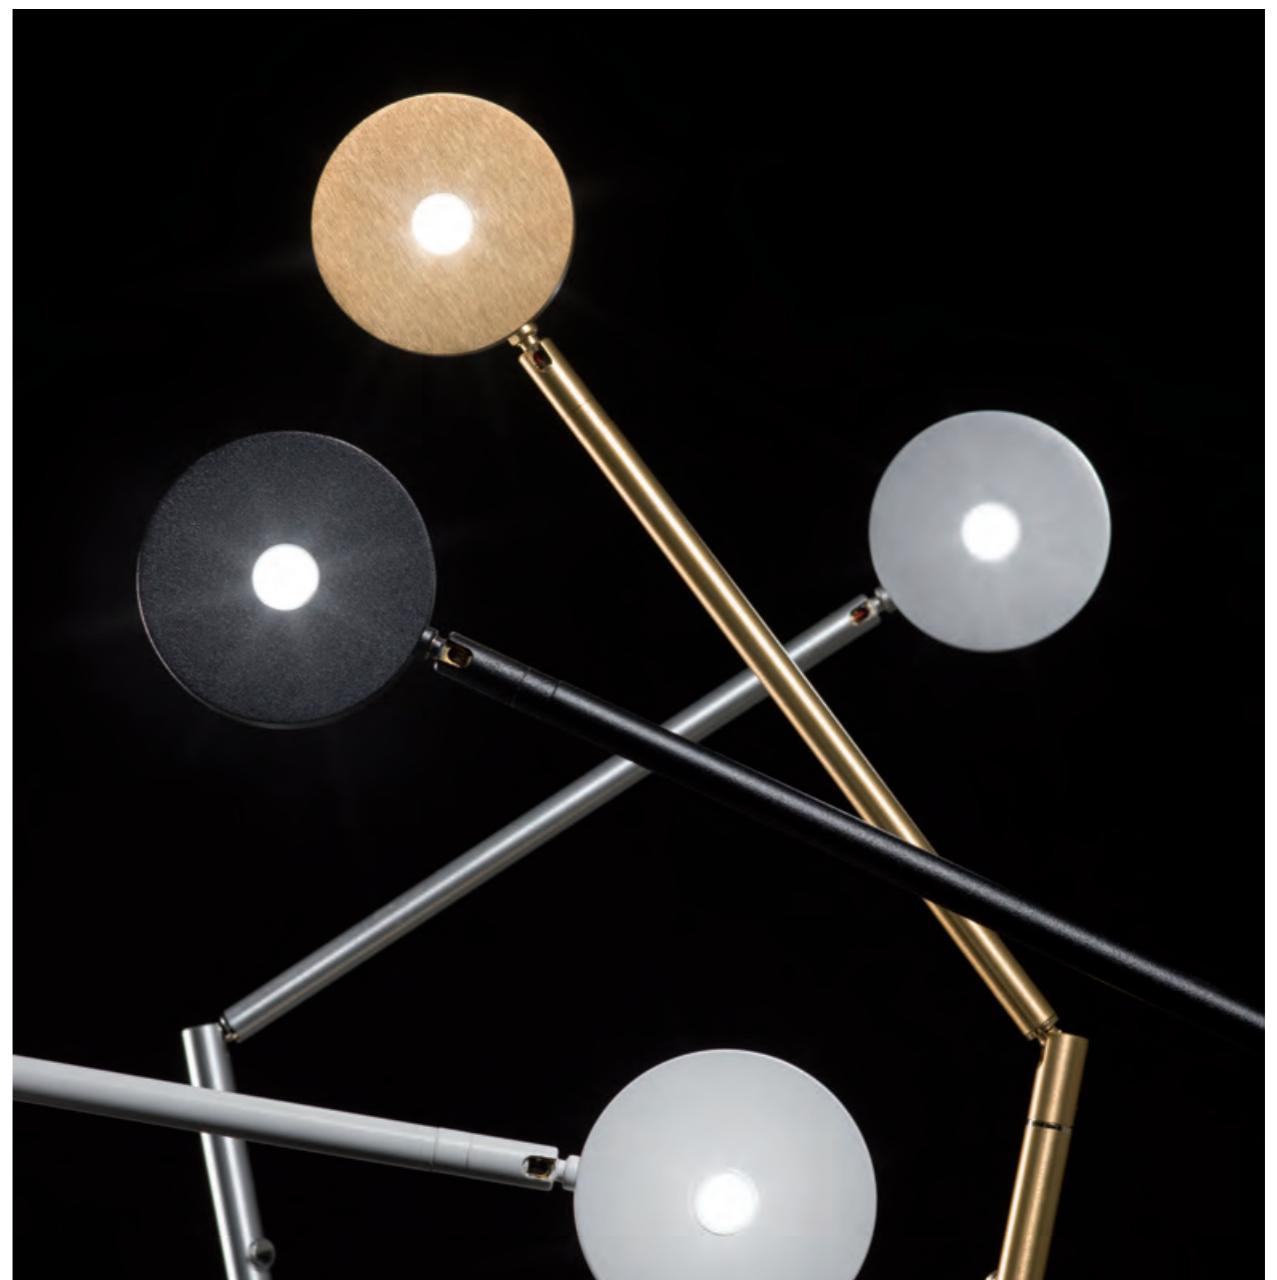

MAESTRIA La cura nel dettaglio trova la massima espressione nella spazzolatura del metallo, lavorazione di finitura eseguita completamente a mano. Quell'artigianalità che conferisce unicità a ciascuna lampada.

DESIGN Designed as a light for reading, studying and working, it allows you to direct the light as required, adjusting the intensity by memory touch dimmer. Provided with 3 joints, it highlights the desired area, ensuring visual comfort.

PERSONALITY Stable, handy, functional. Doc is simply practical, a lamp that offers a quick solution for lighting the work top, the desk and the relaxation corner.

EXPERTISE Attention to detail reaches a high point in the metal brushing, a finishing process carried out 100% by hand. Craftsmanship that makes each product unique.

Storie di geometrie

Stories of geometries

"La linea geometrica è un ente invisibile, essa è la traccia lasciata dal punto in movimento."

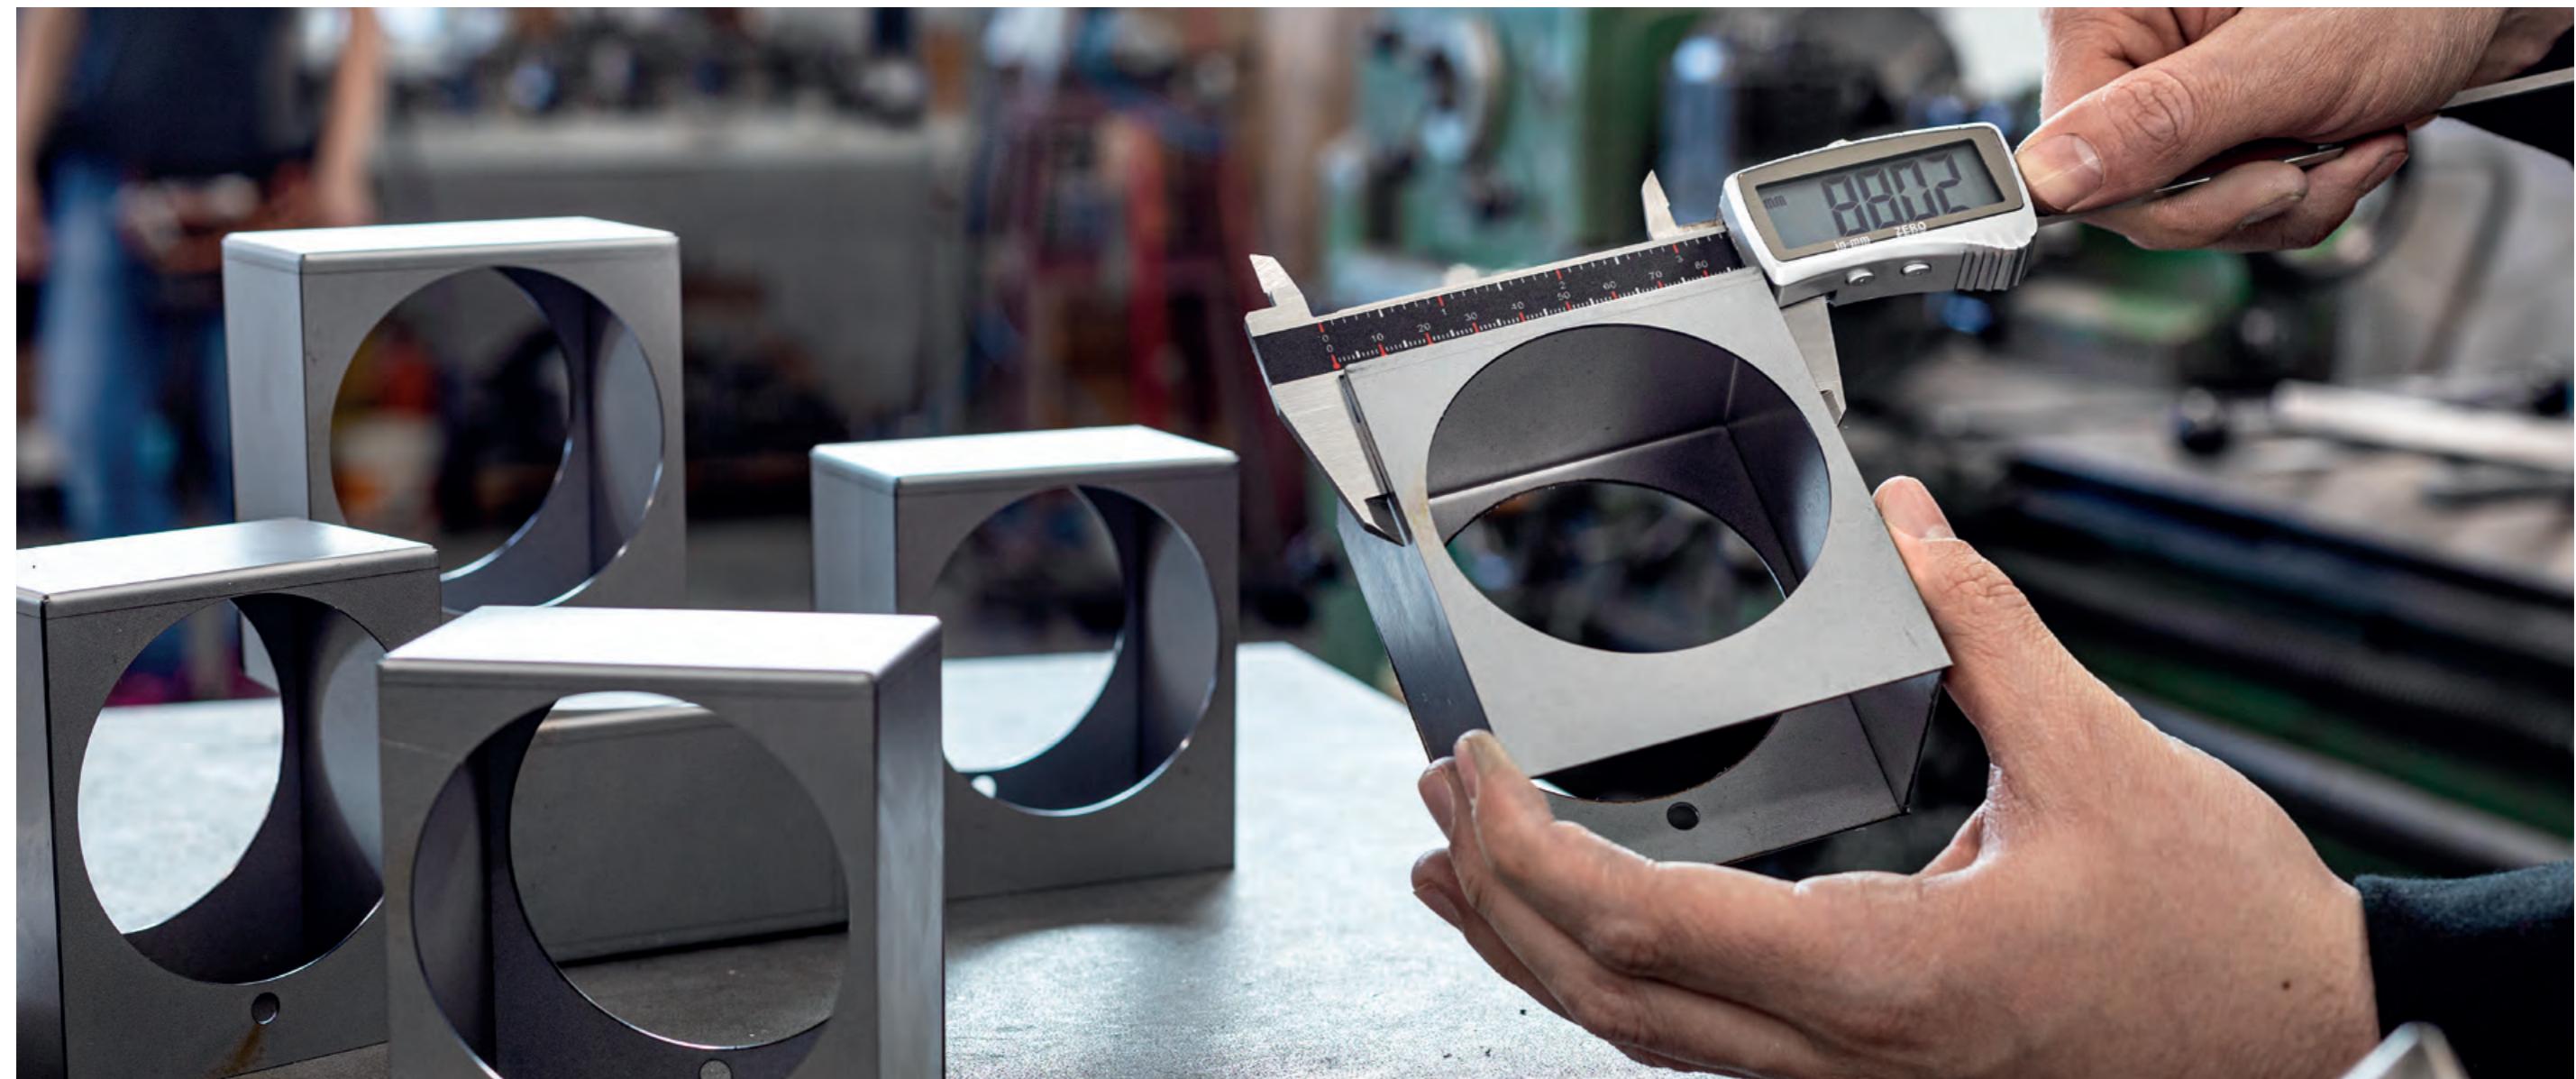

(Wassily Kandiskij - Pittore)

"The geometric line is an invisible entity, it is the trace left by the point in movement."

(Wassily Kandinsky - Painter)

La geometria costituisce uno degli strumenti più importanti per controllare lo spazio e fornire la regola per tracciare e connettere i diversi elementi attraverso i quali si costruisce la realtà architettonica. Le collezioni di Storie di Geometrie raccontano di lampade definite da forme semplici, che si inseriscono negli ambienti in modo funzionale e discreto illuminando gli spazi con equilibrio ed eleganza.

Geometry is one of the most important tools for controlling space and providing rules for tracing and connecting the different elements used in the construction of architectural reality. The collections of Stories of Geometries describe lamps defined by simple forms, which blend in with their surroundings functionally and discreetly, providing balanced elegant lighting.

Klaro

Designer: Mauro Gennari

“Combinazioni di luci” “Light combinations”

DESIGN Klaro propone un'idea nuova di lampada, con una combinazione di luci che possono funzionare sia assieme, sia separatamente. La luce data dalle lampadine GX53 illumina l'ambiente, la strip led illumina il vetro e crea un'atmosfera di luce riflessa diventando luce di cortesia. L'accensione separata può avvenire tramite un dispositivo di selezione (disponibile a parte).

PERSONALITÀ Lampada funzionale. La doppia emissione luminosa favorisce la doppia funzione, da una parte illuminazione diretta della stanza, dall'altra come luce di servizio per illuminare corridoi, scale, camere da letto o stanze per il tempo libero.

MAESTRIA La molatura è una lavorazione artigianale antica, che viene eseguita oggi come un tempo da mani abili e sapienti donando al vetro una dinamica lucentezza.

DESIGN Klaro proposes a new lighting idea, with a combination of lights that can operate both together and separately. The light emitted by the GX53 bulbs lights the room, while the LED strip illuminates the glass and creates an atmosphere of reflected light, becoming a courtesy light. The separate switch-on function can be obtained by means of a selection device (available separately).

PERSONALITY Functional light. The twin light emission offers a dual function: on the one hand direct lighting of the rooms, and on the other a service light for corridors, stairs, bedrooms or play/hobby rooms.

EXPERTISE Grinding is an ancient craft, which is carried out today just as in the past by expert skilled hands, giving the glass a bright lively finish.

Dado

Designer: Elesi Creative Lab

“La semplicità si veste di luce”
“Simplicity dressed in light”

DESIGN Dado è una collezione di applique compatte, elettrificate con attacco GX53. La sua forma geometrica consente di creare combinazioni a parete, giochi di forme che diventano parte dell'arredo nel quale sono inserite.

PERSONALITÀ E' compatta, semplice e lineare senza essere banale. Pura forma, la si sintonizza con i diversi stili di arredamento, esaltandone lo spazio e creando con la luce suggestivi effetti di chiaro/scuro.

MAESTRIA La cura nel dettaglio trova la massima espressione nella spazzolatura del metallo, lavorazione di finitura eseguita completamente a mano. Quell'artigianalità che conferisce unicità a ciascuna lampada

DESIGN Dado is a collection of compact wall lights, electrified with GX53 fitting. Its geometric shape offers plenty of scope for different combinations, playing on changing shapes and forms that become part of the furnishing scheme.

PERSONALITY Compact, simple and linear without being banal. Its pure form blends in with different furnishing styles, highlighting the space and creating striking chiaroscuro lighting effects.

EXPERTISE Attention to detail reaches a high point in the metal brushing, a finishing process carried out completely by hand. An artisan touch that makes each light unique.

Kant

Designer: Maurizio Betteto

“Un puzzle dalle forme geometriche”
“A puzzle with geometric shapes”

DESIGN Soluzione in metallo e illuminazione con lampadine GX53, a vista. La struttura è modulare. Il sistema ad attacco magnetico della struttura ne facilita l'installazione.

PERSONALITÀ La collezione Kant si contraddistingue per la modularità delle lampade che consente di illuminare grandi ambienti con un unico punto luce. Funzionale e pratica, dal design lineare, non banale, ricorda un puzzle dalle forme geometriche.

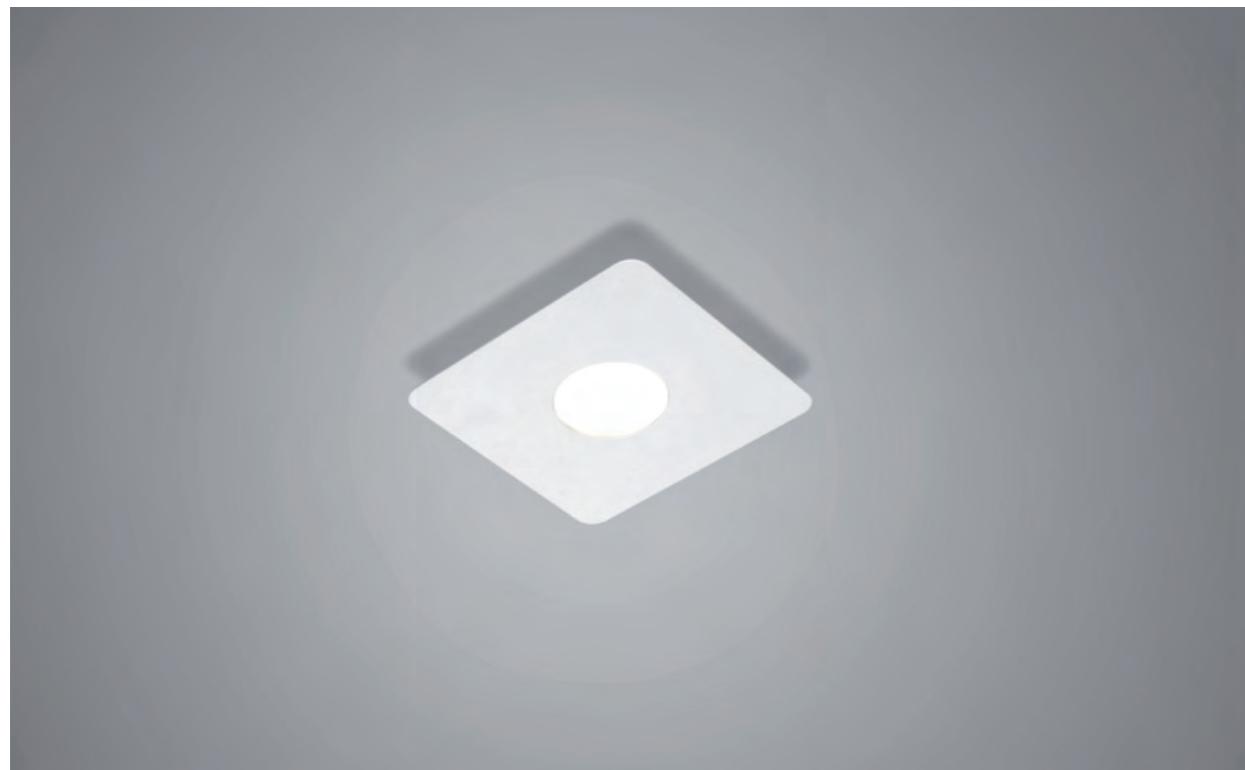

MAESTRIA Ogni lampada è realizzata all'interno del nostro laboratorio creativo, dove l'artigianalità si sposa con la creatività e l'innovazione per eseguire prodotti unici.

DESIGN Metal structure with visible GX53 bulbs. The structure is modular with magnetic fitting system for easy installation.

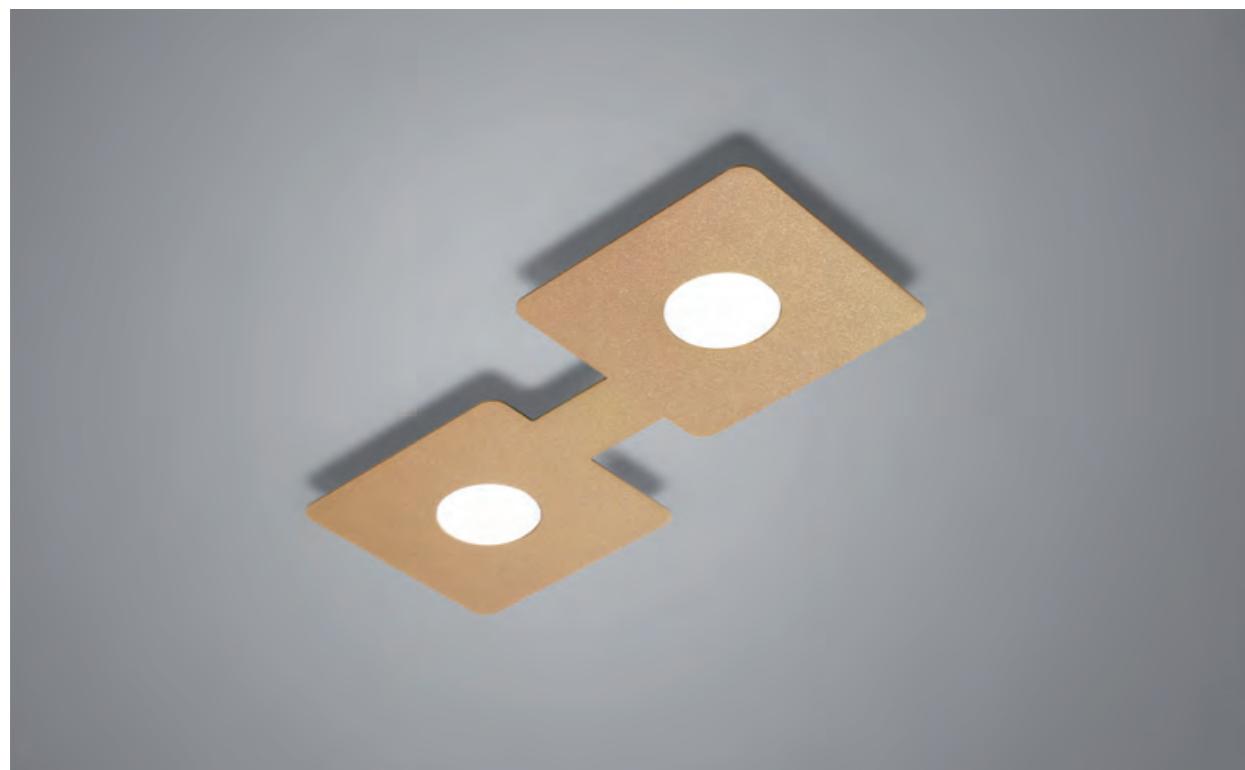

PERSONALITY The Kant collection is characterized by modularity, allowing the illumination of large areas with one single light point. Functional and practical, with an original linear design, it is reminiscent of a puzzle with geometric shapes.

EXPERTISE Each light is made in our workshop, where craftsmanship combines with creativity and innovation, resulting in unique products.

Storie di accordi

"Io vedo la musica come fluida architettura."

(Joni Mitchell - Cantautrice)

Stories of chords

"I see music as fluid architecture."

(Joni Mitchell - Singer/Song writer)

In musica l'Accordo è la simultaneità di più suoni aventi un'altezza definita, è lo stare insieme in armonia. In generale è una raccolta di singoli elementi, che messi assieme sapientemente creano una sinfonia sia essa di note, di forme, di colori o di luce. Storie di Accordi narra di un sistema che si compone di molti elementi, ciascuno dei quali svolge una determinata funzione, e che combinati assieme si traducono in soluzioni illuminotecniche distintive e uniche.

In music a chord is a group of notes sounded together, as a basis of harmony. In general it is a collection of single elements which, when artfully combined, create a symphony of notes, forms, colours or light. Stories of Chords describes a system composed of many elements, each performing a given function and which, when combined together, translate into distinctive and unique lighting solutions.

E-Viva

Designer: Maurizio Betteto

“Un sistema modulare unico”
“A unique modular system”

DESIGN E-Viva è un sistema LED monotubo modulare dal design minimal per creare soluzioni illuminotecniche personalizzate. Il tubo elettrificato, di un diametro di appena 6 mm, è componibile e per questo estremamente adattabile alle diverse esigenze.

PERSONALITÀ E-viva illumina gli ambienti esaltando il tuo stile grazie ai suoi elementi modulari che permettono di realizzare soluzioni personalizzate, alle sorgenti di luce orientabili che mettono in evidenza gli oggetti sui quali si posano.

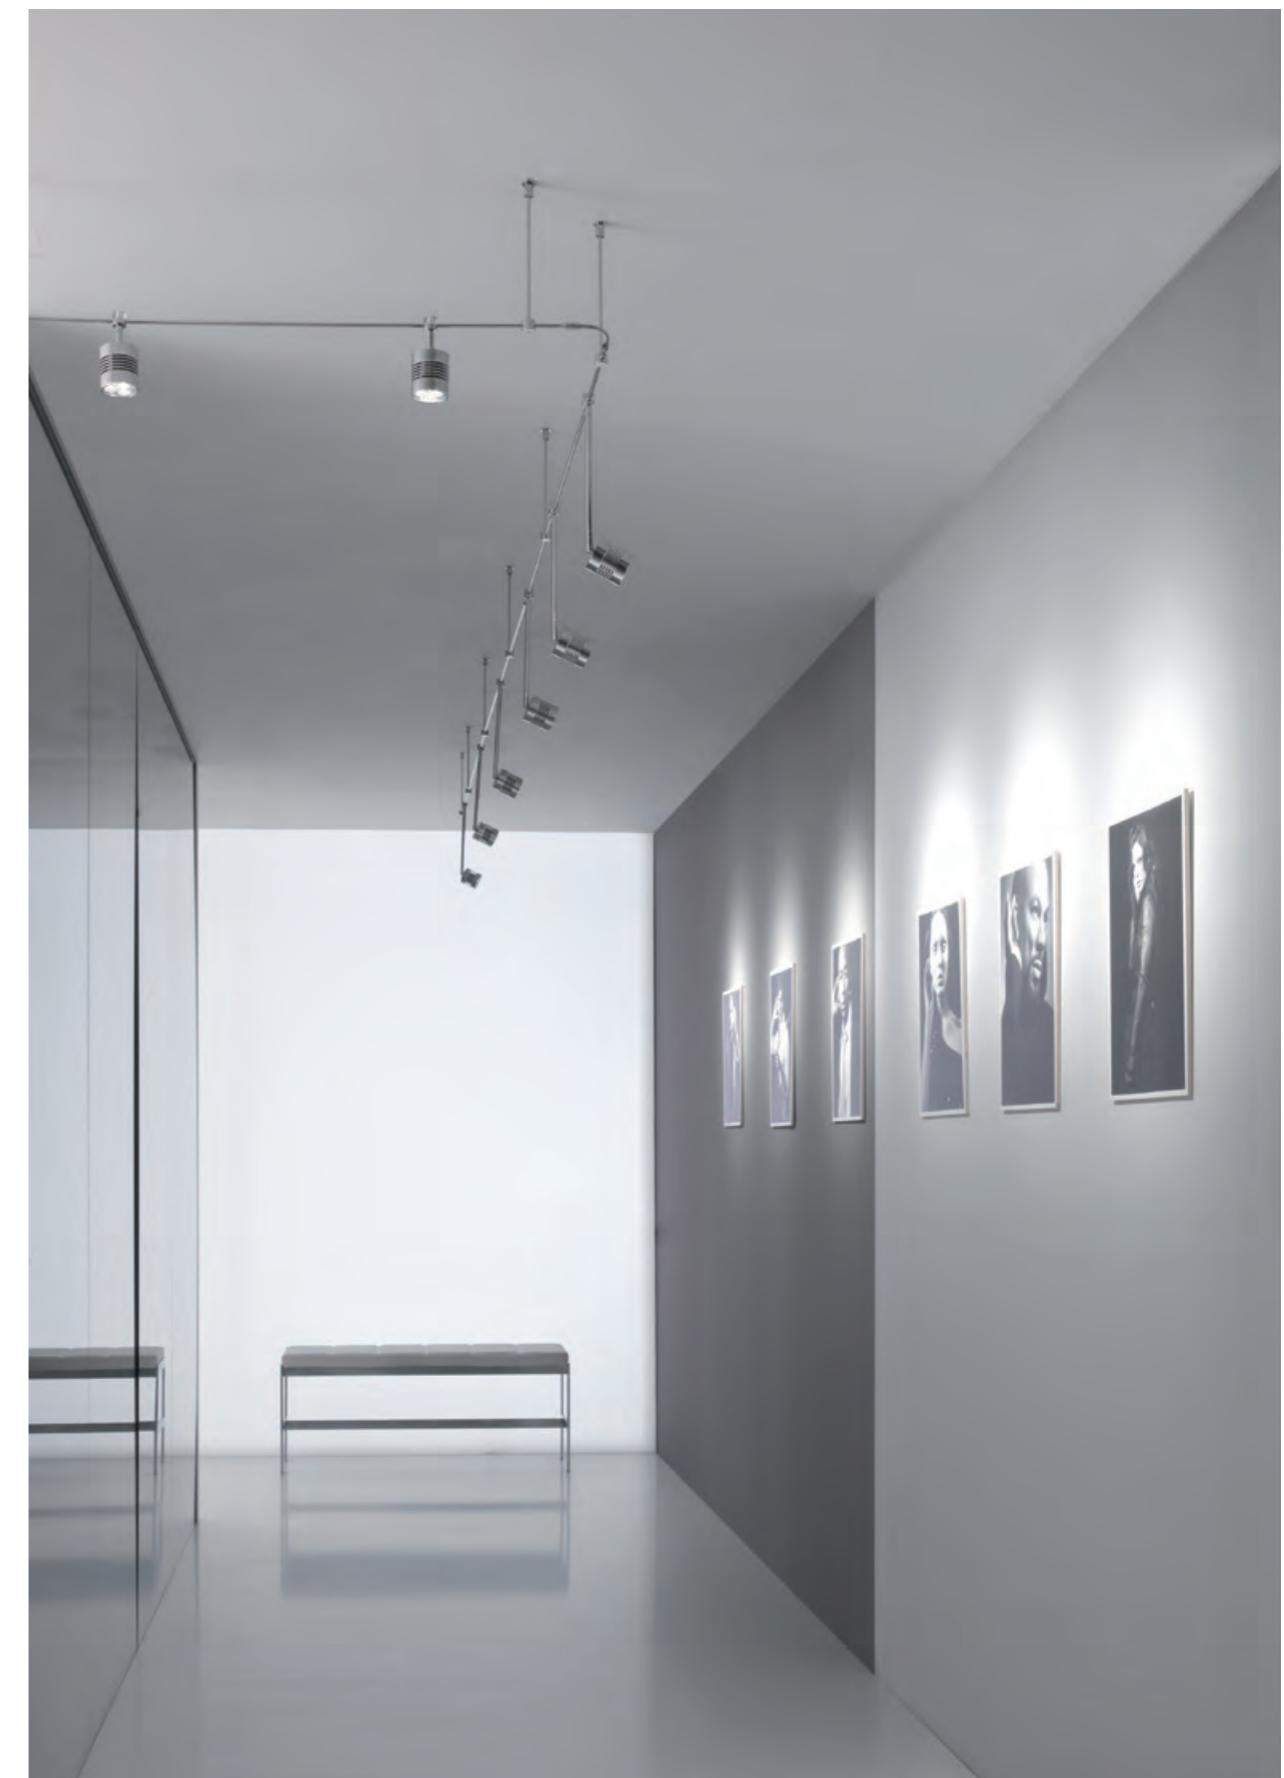

MAESTRIA E-Viva è un sistema a led integrati brevettato da Elesi Luce. La cura nel dettaglio trova la massima espressione nella spazzolatura del metallo, lavorazione di finitura eseguita completamente a mano.

DESIGN E-viva is a modular single-tube LED system featuring a minimalist design to create customized lighting solutions. The electrified tube, with diameter of just 6 mm, is modular and therefore extremely adaptable to different needs.

PERSONALITY E-viva lighting enhances your style thanks to its modular elements that can be used to create customized solutions and the adjustable light sources that highlight individual objects.

EXPERTISE E-Viva is an integrated LED system patented by Elesi Luce. Attention to detail reaches a high point in the metal brushing, a finishing process carried out 100% by hand.
